Independent Auditor's Report

# Statement of Management's Responsibility for Financial Statements

The Management of The Insular Life Assurance Co., Ltd. and Subsidiaries is responsible for the preparation and fair presentation of the financial statements including the schedules attached therein, for years ended December 31, 2020 and 2021, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as Management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Trustees is responsible for overseeing the Company's financial reporting process.

The Board of Trustees reviews and approves the financial statements including the schedules attached therein, and submits the same to the members.

SyCip Gorres Velayo & Co., the independent auditor appointed by the members, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the members, has expressed its opinion on the fairness of presentation upon completion of such audit.

#### INDEPENDENT AUDITOR'S REPORT

The Board of Trustees and Members The Insular Life Assurance Company, Ltd.

#### Report on the Audit of the Consolidated Financial Statements

#### **Opinion**

We have audited the consolidated financial statements of The Insular Life Assurance Company, Ltd. and its subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2021 and 2020, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity, and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at December 31, 2021 and 2020, and their financial performance and their cash flows for the years then ended in accordance with Philippine Financial Reporting Standards (PFRSs).

#### **Basis for Opinion**

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Responsibilities of Management and Those Charged with Governance for the Consolidated **Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

#### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## THE INSULAR LIFE ASSURANCE COMPANY, LTD. AND SUBSIDIARIES (A Domestic Mutual Life Insurance Company)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 1. Corporate Information and Authorization for the Issuance of the Financial Statements

#### 1.1. Corporate Information

The Insular Life Assurance Company, Ltd. (the "Parent Company"), a mutual life insurance company primarily engaged in the life insurance business, was incorporated in the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on November 25, 1910. The Parent Company will be celebrating its 112<sup>th</sup> year anniversary on November 25, 2022.

The registered business address of the Parent Company is Level 30 Insular Life Corporate Centre, Insular Life Drive, Filinvest Corporate City, Alabang, Muntinlupa City.

The Parent Company and its subsidiaries (collectively referred to as the "Group") are primarily engaged in the business of life insurance, healthcare, lending, and investment management (Note 28).

#### 1.2. Authorization for Issuance of the Financial Statements

The consolidated financial statements of the Group were approved and authorized for issuance by the Board of Trustees (BOT) on April 28, 2022.

#### 2. Summary of Significant Accounting and Financial Reporting Policies

#### 2.1. Statement of Compliance

The consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

#### 2.2. Basis of Preparation

The consolidated financial statements have been prepared on a historical cost basis, except for financial assets at fair value through profit or loss (FVPL) and available-for-sale (AFS) financial assets that have been measured at fair value.

The financial statements are presented in Philippine Peso (Peso), which is the Group's functional and presentation currency. All amounts were rounded to the nearest Peso, except when otherwise indicated.

### 2.3. Changes in Accounting Policies

#### 2.3.1. New Standards and Interpretations Issued and Effective as at January 1, 2021

The accounting policies adopted are consistent with those of the previous financial year except for the following new pronouncements and amendments to existing PFRS that became effective beginning January 1, 2021 and which did not have any significant impact on the Group's financial statements.

- Amendment to PFRS 16, COVID-19-related Rent Concessions beyond 30 June 2021
- Amendments to PFRS 9, PAS 39, PFRS 7, PFRS 4 and PFRS 16, *Interest Rate Benchmark Reform Phase 2*

#### 2.3.2. Standards Issued but Not Yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2022

- Amendments to PFRS 3, Reference to the Conceptual Framework
- Amendments to PAS 16, Plant and Equipment: Proceeds before Intended Use
- Amendments to PAS 37, Onerous Contracts Costs of Fulfilling a Contract
- Annual Improvements to PFRSs 2018-2020 Cycle
  - o Amendments to PFRS 1, First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter
  - Amendments to PFRS 9, Financial Instruments, Fees in the '10 per cent' test for derecognition of financial liabilities
  - o Amendments to PAS 41, Agriculture, Taxation in fair value measurements

Effective beginning on or after January 1, 2023

- Amendments to PAS 12, Deferred Tax related to Assets and Liabilities arising from a Single Transaction
- Amendments to PAS 8, Definition of Accounting Estimates
- Amendments to PAS 1 and PFRS Practice Statement 2, Disclosure of Accounting Policies

Effective beginning on or after January 1, 2024

• Amendments to PAS 1, Classification of Liabilities as Current or Non-current

Effective beginning on or after January 1, 2025

• PFRS 17, *Insurance Contracts* 

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and reinsurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

On December 15, 2021, the FRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the International Accounting Standards Board (IASB).

PFRS 17 is effective for reporting periods beginning on or after January 1, 2025, with comparative figures required. Early application is permitted.

As of December 31, 2021, the Company was able to evaluate, acquire, and configure the appropriate software solution and perform tests to generate the relevant financial reports. An end-to-end system process testing is being performed by the Company to enhance data capture, improve actuarial models and finalize the relevant methodology and assumptions to be adopted. The Company has an ongoing impact assessment of the movement in fund balances and attribution of cash flows to insurance contracts. The Company has also reviewed and started to implement changes to existing accounting practices as part of the preparations for PFRS 17 adoption.

#### • PFRS 9, Financial Instruments

PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39, *Financial Instruments: Recognition and Measurement*, and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting.

The adoption of PFRS 9 will have an effect on the classification and measurement of the Group's financial assets and impairment methodology for financial assets, but will have no impact on the classification and measurement of the Group's financial liabilities. The adoption will also have an effect on the Group's amount of credit losses.

PFRS 9 became effective as at January 1, 2018. However, the Group elected to apply the deferral approach in the application of PFRS 9 as permitted by the Amendments to PFRS 4, *Applying IFRS 9 financial instruments with IFRS 4 Insurance Contracts* issued in September 2016. Hence, PFRS 9 will be adopted simultaneously with the adoption of PFRS 17.

#### Deferred effectivity

• Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28, Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

#### 2.4. Basis of Consolidation

The consolidated financial statements comprise the financial statements of Parent Company and its subsidiaries (the Group) as at and for the years ended December 31, 2021 and 2020.

Specifically, the Group controls an investee if and only if it has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure (or rights) to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee,

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. A subsidiary is an entity that is controlled by the Parent Company (i.e., either directly or through intermediate parent companies within the Group). Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income, and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statements of comprehensive income from the date the Parent Company gain control until the date the Parent Company ceases to control the subsidiary.

Following are the Parent Company's 100%-owned subsidiaries as of December 31, 2021 and 2020:

- Insular Investment Corporation (IIC)
  - o IITC Properties, Inc.\*
  - Insular Property Ventures, Inc.\*
- Insular Health Care Incorporated (I-Care)
- Insular Life Management and Development Corporation (ILMADECO)
  - ILAC General Insurance Agency, Inc. (ILAC-Gen)\*\*
- Insular Life Property Holdings, Inc. (ILPHI)\*\*\*
  - \*Represents the Group's ownership through IIC
  - \*\*Represents the Group's ownership through ILMADECO \*\*\*ILPHI's corporate life ended on March 31, 2020

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent Company. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses, and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The financial statements of the subsidiaries are prepared for the same reporting years as the Group, except for ILMADECO which is consolidated based on its financial statements as of March 31, 2022 and 2021 and for the years then ended, using consistent accounting principles and policies.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it: (a) derecognizes the assets and liabilities of the subsidiary; (b) derecognizes the carrying amounts of any non-controlling interest; (c) derecognizes the cumulative translation differences recorded in equity; (d) recognizes the fair value of consideration received; (e) recognizes the fair value of any investment retained; (f) recognizes any surplus or deficit in profit or loss; and (g) reclassifies the parent's share of components previously recognized in OCI to profit or loss.

#### 2.5. Fair Value Measurement

The Group measures its financial assets at FVPL and AFS at fair value at each reporting date. Also, the fair values of held-to-maturity (HTM) securities, and other financial liabilities measured at amortized cost are disclosed in Note 30.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; or
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring and non-recurring fair value measurement.

At each reporting date, the management analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics, and risks of the asset or liability, and the level of the fair value hierarchy as explained in previous page.

#### 2.6. Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three

months or less from the date of acquisition and that are subject to an insignificant risk of change in value.

#### 2.7. Short-term Investments

Short-term investments are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of more than three months but less than one year from dates of placemen. These earn interests at the respective short-term investment rates.

#### 2.8. Financial Instruments

The Group recognizes a financial asset or a financial liability in the statements of financial position when it becomes a party to the contractual provisions of the instrument

All regular way purchases and sales of financial assets are recognized on the trade date, i.e., the date the Group commits to purchase or sell the financial asset. Regular way purchases or sales of financial assets require delivery of financial assets within the time frame generally established by regulation or convention in the market place.

Financial assets and financial liabilities are recognized initially at fair value. Transaction costs, if any, are included in the initial measurement of all financial assets and financial liabilities, except for financial instruments measured at FVPL.

The Group classifies its financial assets as financial assets at FVPL, HTM financial assets, loans and receivables, or AFS financial assets, as appropriate. Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or other financial liabilities, as appropriate. The classification depends on the purpose for which the financial instruments were acquired or originated. Management determines the classification of its financial instruments at initial recognition and, where allowed and appropriate, re-evaluates this designation at every reporting date.

#### 2.8.1. Financial Assets

#### (a) Financial Assets at FVPL

Financial assets at FVPL include financial assets held-for-trading purposes or designated by management as financial asset at FVPL at initial recognition. Derivative instruments, except those covered by hedge accounting relationships, are classified under this category.

Financial assets are classified as held-for-trading if they are acquired for the purpose of selling in the near term.

Financial assets are designated as at FVPL by management on initial recognition when any of the following is met:

- i. The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the financial assets or recognizing gains or losses on them on a different basis:
- ii. The financial assets are part of a Group of financial assets which are managed and their performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy; or
- iii. The financial asset contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

These financial assets are subsequently measured at fair market value. Realized and unrealized gains and losses arising from changes in fair market value of financial assets at FVPL are recognized in the statements of income. Interest earned on debt securities is recognized as the interest accrues. Dividend income on equity securities is recognized according to the terms of the contract or when the right to receive payment has been established.

These financial assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis in accordance with a documented investment strategy. The Group manages these financial assets in accordance with the investment strategy and valuation provisions of the Variable Unit-Linked (VUL) insurance contracts. Likewise, this is consistent with the valuation basis of the reserve for policies held by the policyholders. These financial assets consist primarily of quoted government and corporate debt securities with fixed interest rates, quoted equity securities, and structured notes.

The Group also has investments in quoted preferred equity shares and investments in mutual funds amounting to ₱1,332,687,694 and ₱3,393,768,696 as of December 31, 2021 and 2020, respectively, which are designated as at FVPL (Note 7).

#### (b) HTM Financial Assets

HTM financial assets are non-derivative financial assets that are quoted in the market, with fixed or determinable payments and fixed maturity which the Group has the positive intention and ability to hold to maturity. Financial assets intended to be held for an undefined period are not included in this classification. HTM financial assets are subsequently measured at amortized cost. The amortized cost is computed as the amount initially recognized minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initially recognized amount and the maturity amount. This calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums and discounts. Gains and losses are recognized in the statements of income when the financial assets are derecognized, impaired, or amortized.

The Group's HTM financial assets consist of quoted government and corporate debt securities with fixed interest rates (Note 7).

#### (c) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are subsequently measured at amortized cost. The amortized cost is computed as the amount initially recognized minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initially recognized amount and the maturity amount. This calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums and discounts. Gains and losses are recognized in the statements of income when the financial assets are derecognized, impaired, or amortized.

The Group's loans and receivables consist of cash and cash equivalents, insurance receivables, unquoted debt security, term loans, policy loans, accounts receivable, interest

receivable, housing loans, car financing loans, mortgage loans, due from agents, and other receivables (Note 7).

#### (d) AFS Financial Assets

AFS financial assets are non-derivative financial assets which are designated as such or do not qualify to be classified as designated as at FVPL, HTM, or loans and receivables. Financial assets may be designated at initial recognition as AFS if they are purchased and held indefinitely and may be sold in response to liquidity requirements or changes in market conditions.

AFS financial assets are subsequently measured at fair market value. When the fair value of AFS financial assets cannot be measured reliably because of lack of reliable estimates of future cash flows and discount rates necessary to calculate the fair value of unquoted equity securities, these financial assets are carried at cost, less any allowance for impairment losses.

The effective yield component of AFS debt securities as well as the impact of translation of foreign currency-denominated AFS debt securities is reported in the consolidated statements of income. Interest earned on holding AFS financial assets is reported as interest income using the effective interest method. Dividends earned on holding AFS financial assets are recognized in the statements of income as investment income when the right to receive payment has been established. Unrealized gains and losses arising from changes in fair market value of AFS financial assets are reported in OCI until the financial asset is derecognized or as the financial asset is determined to be impaired.

When the security is disposed of, the cumulative gain or loss previously recognized in OCI is recognized as realized gain in the consolidated statements of income.

The Group's AFS financial assets consist of quoted government and corporate debt securities with fixed interest rates, and quoted and unquoted equity securities (Note 7).

#### 2.8.2. Financial Liabilities

Issued financial instruments or their components, which are not designated as at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares. Other financial liabilities are non-derivative financial liabilities with fixed or determinable payment that are not quoted in an active market.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. The amortized cost is computed as the amount initially recognized minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initially recognized amount and the maturity amount. This calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums and discounts. Gains and losses are recognized in the statements of income when the financial liabilities are derecognized, impaired, or amortized.

The Group's other financial liabilities consist of accrued expenses and other liabilities except for provisions and statutory liabilities (Note 14).

#### 2.8.3. Day 1 gain or loss

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (Day 1 gain or loss) in the consolidated statements of income unless it qualifies for recognition as some other type of asset. In cases where fair value is determined using data which is not observable, the difference between the transaction price and model value is only recognized in the consolidated statements of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the Day 1 amount.

#### 2.8.4. Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements and the related assets and liabilities are presented gross in the consolidated statements of financial position.

#### 2.9. Classification of Financial Instruments Between Debt and Equity

A financial instrument is classified as debt if it provides for a contractual obligation to: deliver cash or another financial asset to another entity; exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instruments as a whole the amount separately determined as the fair value of the liability component on the date of issue.

#### 2.10.Derecognition of Financial Instruments

#### 2.10.1. Financial Assets

A financial asset is derecognized when:

- the right to receive cash flows from the financial asset has expired;
- the Group retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Group has transferred its right to receive cash flows from the financial asset and either: (a) has transferred substantially all the risks and rewards of the financial asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the financial asset, but has transferred control of the financial asset.

Where the Group has transferred its rights to receive cash flows from a financial asset and has neither transferred nor retained substantially all the risks and rewards of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Group's continuing involvement in the financial asset.

#### 2.10.2. Financial Liabilities

A financial liability is derecognized when the obligation under the financial liability is extinguished, i.e., when discharged or cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing financial liability are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability and the difference in the respective carrying amounts is recognized in the statements of income.

#### 2.11. Impairment of Financial Assets

The Group assesses at each reporting date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default, or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

#### 2.11.1. Financial Assets Carried at Amortized Cost

If there is objective evidence that an impairment loss on financial assets carried at amortized cost has been incurred, the amount of impairment loss is measured as the difference between the financial asset's carrying amount and the present value of estimated future cash flows (excluding expected future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate, i.e., the effective interest rate computed at initial recognition. The carrying amount of the financial asset shall be reduced either directly or through the use of an allowance account. HTM financial assets and loans and receivables, together with the associated allowance accounts are written off when there is no realistic prospect of future recovery and all the collaterals have been realized. The amount of the loss shall be recognized in the consolidated statements of income.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant and individually or collectively for financial assets that are not individually significant. Objective evidence includes observable data that comes to the attention of the Group about loss events such as but not limited to significant financial difficulty of the counterparty, a breach of contract, such as a default or delinquency in interest or principal payments, probability that the borrower will enter bankruptcy or other financial re-organization. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the financial asset is included in a group of financial assets with similar credit risk characteristics such as customer type, payment history, past due status and term, and that group of financial assets is collectively assessed for impairment. Those

characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtor's ability to pay all amounts due according to the contractual terms of the assets being evaluated. Financial assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in a collective assessment of impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the consolidated statements of income to the extent that the carrying value of the financial asset does not exceed its amortized cost at the reversal date.

The Group performs a regular review of the age and status of these accounts, designed to identify accounts with objective evidence of impairment and provide the appropriate allowance for impairment loss. The review is accomplished using a combination of specific and collective assessment approaches, with the impairment loss being determined for each risk grouping identified by the Group.

#### 2.11.2. AFS Financial Assets

If an AFS financial asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortization) and its current fair value, less any impairment loss previously recognized in the consolidated statements of income, is transferred from OCI to the consolidated statements of income.

In the case of debt instruments classified as AFS financial assets, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued based on the rate of interest used to discount future cash flows for the purpose of measuring impairment loss. Such accrual is recorded as part of "Investment income" in the consolidated statements of income. If, in subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss is recognized in the consolidated statements of income, the impairment loss is reversed through the consolidated statements of income.

In case of equity securities classified as AFS financial assets, objective evidence would include a significant or prolonged decline in the fair value of the financial assets below its cost or where other objective evidence of impairment exists. Where there is evidence of impairment, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statements of income, is removed from OCI and recognized in the consolidated statements of income. Impairment losses on equity securities are not reversed through the consolidated statements of income. Increases in fair value after impairment and reversals of impairment losses on equity instruments are recognized directly in OCI.

#### 2.11.3. Financial Assets Carried at Cost

If there is objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such an unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between

the financial asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

#### 2.12.Investments in Associates

The investments in associates are accounted for under the equity method. An associate is an entity in which the Group has significant influence.

The reporting dates of the associates and the Group are identical and the associates' accounting policies conform to those used by the Group for like transactions and events in similar circumstances. The Group adjusts the equity and profit or loss of the associates, as applicable, for any significant difference in accounting policies for like transaction and similar circumstances except for the accounting for financial instruments starting 2018. Beginning January 1, 2018, the Group applies the temporary exemption from PFRS 9 but UBP applies PFRS 9 as permitted under the Amendments to PFRS 4 (Note 8).

The Group's percentages of ownership in the shares of stock of associates as of December 31 are as follows:

	Percentage of Ownership		
	2021	2020	
PPI Prime Ventures, Inc. (PPVI)	30.00%	30.00%	
Mapfre Insular Insurance Corporation (MIIC)	25.00%	25.00%	
Union Bank of the Philippines (UBP)	13.72%	16.29%	

Under the equity method, the investments in associates are carried in the consolidated statements of financial position at cost plus post-acquisition changes in the Group's share of net assets of the associates adjusted for the financial impact of significant differences in accounting policies for like transactions and similar circumstances. The Group determines whether it is necessary to recognize any impairment loss in respect to the Group's net investment in the associate. The consolidated statements of income reflect the share of the results of operations of the associate. Where there has been a change recognized directly in the equity of the associate, the Group recognizes its share on the said change and discloses this, when applicable, in the consolidated statements of changes in members' equity. Profits or losses resulting from transactions between the Group and the associates are eliminated to the extent of the Group's interest in the associate.

The statement of income reflects the Group's share of the results of operations of the associate or joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the associate or joint venture, the Group recognizes its share of any changes, when applicable, in the statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss of associates and a joint venture is shown on the face of the statement of income outside operating profit and represents share in the profit or loss after tax.

Reduction in investment in an associate deemed as disposal is accounted for using the entity concept method. Under the entity concept method, the Group should regard the deemed disposal of investment in an associate as an equity transaction. Gain or loss from the deemed disposal of investment in an associate is recognized as a separate component in the members' equity section of the consolidated statements of financial position (Note 8).

#### 2.13. Investment Properties

Investment properties consist of land, buildings, and improvements (or portion of them) owned by the Group that are leased to others or held for capital appreciation or both. Investment properties are stated at cost, including transaction costs, less accumulated depreciation and amortization and any impairment in value. Depreciation of building is computed on a straight-line method over the estimated useful life of the properties of 40 years.

Investment properties are derecognized when they have been disposed, permanently withdrawn from use, or when no future economic benefit is expected from their disposal. Any gain or loss on the disposal of an investment property is recognized in the consolidated statements of income in the year of disposal.

The investment properties' use, estimated useful life, and method of depreciation and amortization are reviewed on a regular basis and transferred to other property accounts, if appropriate, upon determination of change in use.

Transfers are made to investment property when, and only when, there is a change in use, evidenced by the end of owner-occupation or commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale.

For a transfer from investment property to property and equipment and transfer of property and equipment to investment property, the Group accounts for such property in accordance with the policy stated under investment property and property and equipment, respectively, up to the date of change in use.

Where a single property is partly held for use in the supply of services and partly for capital appreciation or rentals, the Group accounts for these portions separately if these portions could be separately sold or leased out under a finance lease. If these portions could not be sold separately, the property is considered by management as investment property only if an insignificant portion is held for use in the supply of services.

#### 2.14. Property and Equipment

Property and equipment, including owner-occupied properties, except for land, are stated at cost, net of accumulated depreciation and amortization and any impairment in value. Land is stated at cost less any impairment in value.

The initial cost of property and equipment consists of its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditures incurred after the property and equipment have been put into operation, such as repairs and maintenance and overhaul costs, are normally charged to consolidated statements of income in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of the property and equipment.

Depreciation and amortization of property and equipment commence, once the property and equipment are available for use and are computed using the straight-line method over the estimated useful lives (EUL) of the assets regardless of utilization.

The EUL of property and equipment of the Group follows:

	Years
Buildings	40
Building equipment	25
Furniture, fixtures, and equipment	3-10
Electronic and data processing equipment	3-5
Transportation equipment	4-5
Right-of-use asset	5-10

Leasehold improvements are amortized over the term of the lease or the EUL of five years, whichever is shorter.

Depreciation of an item of property and equipment begins when the asset becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management.

The assets' residual values, estimated useful lives, and depreciation and amortization method are reviewed and adjusted, if appropriate, at each financial year-end.

An item of property and equipment is derecognized upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising from its derecognition, calculated as the difference between the net disposal proceeds and the carrying amount of the property and equipment, is included in the consolidated statements of income in the year the property and equipment is derecognized.

It is the Group's policy to classify right-of-use assets as part of property and equipment. Refer to the accounting policies on Right-of-use assets in Note 2.22.1.

#### 2.15. Computer Software

Computer software, included under "Other assets" in the consolidated statements of financial position, is carried at cost less accumulated amortization and impairment loss, if any. Costs incurred to acquire computer software (not an integral part of its related hardware) and bring it to its intended use and costs directly associated with the development of identifiable computer software that generate expected future benefits to the Group are capitalized. All other costs of developing and maintaining computer software programs are recognized as expenses as incurred. These costs are amortized over the EUL of five years. Subsequently, computer software is measured at cost, less any accumulated amortization and any accumulated impairment loss.

Periods and method of amortization for computer software are reviewed annually or earlier when an indicator of impairment exists.

#### 2.16.Impairment of Nonfinancial Assets

The Group's nonfinancial assets consist of investments in associates, investment properties, property and equipment, and other assets.

At each reporting date, the Group assesses whether there is any indication that its nonfinancial assets may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Group makes a formal estimate of recoverable amount. Recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate

cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of the cash generating unit to which it belongs. Where the carrying amount of an asset (or cash generating unit) exceeds its recoverable amount, the asset (or cash generating unit) is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash generating unit).

An impairment loss is charged against operations in the year in which it arises, unless the asset is carried at a revalued amount, in which case the impairment loss is charged against the revaluation increment of the said asset.

For nonfinancial assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit and loss unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase. After such reversal, the depreciation expense is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its estimated remaining life.

#### 2.17. Retained Earnings

Retained earnings represent the cumulative balance of net income, dividend distributions, and other capital adjustments, including retrospective restatements. Retained earnings may be classified as unappropriated retained earnings and appropriated retained earnings. Unappropriated retained earnings represent that portion which is free and can be declared as dividends to members. Appropriated retained earnings represent that portion which is restricted and, therefore, not available for any dividend declaration.

#### 2.18.Insurance Contracts

#### 2.18.1. Product Classification

#### (a) Insurance and Investment Contracts

Insurance contracts are those contracts where the Group has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Group determines whether it has significant insurance risk by comparing benefits payable on occurrence of insured event with benefits payable on non-occurrence of insured event at inception. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index or price or rates, a credit rating or credit index, or other variable.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations have been extinguished or have expired. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

Insurance and investment contracts are further classified as being either with or without discretionary participation features (DPF). DPF is a contractual right to receive, as a supplement to guaranteed benefits, additional benefits that are:

- likely to be a significant portion of the total contractual benefits;
- whose amount or timing is contractually at the discretion of the issuer; and
- contractually based on the: (a) performance of a specified pool of contracts or a specified type of contract; (b) realized and/or unrealized investment returns on a specified pool of assets held by the issuer; or (c) profit or loss of the Group, fund or other entity that issues the contract.

#### (b) Variable Unit-Linked (VUL) Insurance Contracts

The Group issues VUL insurance contracts. In addition to providing life insurance coverage, a VUL insurance contract links payments to units of an investment fund set up by the Group with the consideration received from the policyholders. Premiums received from the issuance of VUL insurance contracts are recognized as premium revenue. As allowed by PFRS 4, *Insurance Contracts*, the Group chose not to unbundle the investment fund of its VUL insurance contracts.

The liability for the investment portion of VUL insurance contracts is increased by additional deposits and changes in unit prices and is decreased by policy administration fees, fund charges, mortality and surrender charges, and any withdrawals. As of the reporting date, this liability is computed on the basis of the number of units allocated to the policyholders multiplied by the unit price of the underlying investment funds.

The fund assets and liabilities are separately administered by, under Separate Funds by the Parent Company's trustee, a third party multinational bank accredited by the Bangko Sentral ng Pilipinas (BSP). The fund assets are designated as financial assets at FVPL and are valued on a basis consistent with the measurement basis in the consolidated statements of financial position. The fund liabilities are included in "Members' deposits and other funds on deposit" under "Other insurance liabilities" (Note 13).

#### (c) Options and Guarantees

Options and guarantees within insurance contracts are treated as derivative financial instruments which are clearly and closely related to the host contract and are, therefore, not accounted for separately.

#### 2.18.2. Recognition and Measurement

#### (a) Premiums

Premiums are recognized as revenue when they become due from the policyholders which, for single premium business, is the date from which the policy is effective. Due premiums which remain unpaid within the statutory defined limit are recognized as part of assets.

#### (b) Membership fees

Membership fees from membership contracts of I-Care are recognized using the 24<sup>th</sup> method.

#### (c) Reinsurance Assets

The Group cedes insurance risk in the normal course of business. Reinsurance assets represent balances due from reinsurance companies. Ceded reinsurance arrangements do not relieve the Group from its obligations to policyholders. Recoverable amounts are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contract.

The Group also assumes reinsurance risk in the normal course of business. Premiums and claims on assumed reinsurance are recognized in the consolidated statements of income in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the associated reinsurance contract.

Claims receivable from reinsurers on businesses ceded are offset against premiums payable to the reinsurers which is customary in the industry.

An impairment review is performed on all due premiums and reinsurance assets whenever events or circumstances indicate that impairment loss occurs. Due premiums and reinsurance assets are impaired only if there is objective evidence that the Group may not receive all amounts due to it under the terms of the contract and that this can be measured reliably. If such evidence exists, impairment loss is recognized in the consolidated statements of income.

The Group uses the statutory guideline in evaluating impairment wherein premiums remaining unpaid beyond a limit set by the IC are impaired and are no longer recognized in the financial statements.

#### (d) Legal Policy Reserves

For traditional policies with coverages beyond one year, the liability is calculated based on the Gross Premium Valuation ("GPV") method and is the sum of the present values of future benefits (including death, surrender, maturity, survivorship, dividends) and expenses (commissions, policy taxes, operational expenses), less the present value of future gross premiums arising from the policy discounted at the appropriate risk-free discount rate for policies with coverages beyond one year. These expected future cash flows are determined using best estimate assumptions with due regard to significant recent experience and margin for adverse deviation from the expected experience mandated by recent regulations.

The GPV methodology, projecting all future cash flows that go with a policy and with margins for adverse deviation is deemed to result to acceptable sufficient levels of reserves per regulations. Thus, the GPV methodology is deemed to satisfy provisions of determining reserves sufficiency level under PFRS 4.

For policies with coverages one year or less and for the risk portion of variable unit-linked policies, unearned premium reserves method is used.

#### (e) Benefits and Claims

Life insurance claims reflect the cost of all claims arising during the year. Death claims and surrenders are recorded on the basis of notifications received. Maturities and annuity payments are recorded when due.

#### (f) Incurred But Not Reported (IBNR) Claims

IBNR claims are based on the estimated ultimate cost of unreported claims incurred but not settled at the reporting date, together with related claims handling costs. These costs pertain to estimates of the Group's obligations to the policyholders where the Group has not yet received notification. Delays can be experienced in the notification and settlement of obligations; therefore, the ultimate cost of which cannot be known with certainty at the reporting date. The Group develops estimates for IBNR taking into considerations the Group's prior experience.

#### 2.19. Revenue recognition

The Group is primarily engaged in the business of insurance, leasing, investing in financial instruments and fund management. Insurance contracts, leasing agreements and financial instruments are within the scope of PFRS 4, *Insurance Contracts*, PFRS 16, *Leases* and PAS 39, *Financial Instruments: Recognition and Measurement*, respectively. Hence, they are outside the scope of PFRS 15, *Revenue from Contracts with Customers*. Fund management is within the scope of PFRS 15.

The revenue recognition policy for premiums is discussed in Note 2.18.2. Revenue recognition criteria for revenues outside the scope of PFRS 15 follow:

#### 2.19.1. Interest Income

Interest income is recognized in the statements of income as it accrues, taking into account the effective interest rate of the related asset or an applicable floating rate. Interest income includes the amortization of any discount or premium or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest basis.

Interest income on policy loans is earned over the term of the loan, normally over one year. The unearned portion of the interest on policy loans deducted in advance is presented as a contra asset in "Policy loans" under "Loans receivables."

Interest income on impaired mortgage loans and collateral and guaranteed loans is recognized as cash is received

#### 2.19.2. Dividend Income

Dividend income is recognized when the right to receive the payment is established.

#### 2.19.3. Rental Income

Rental income from investment properties is recognized on a straight-line basis over the lease term.

#### 2.19.4. Trading gains and losses

Trading gains and losses arise from the buying and selling, and changes in fair value of financial assets and financial liabilities categorized upon initial recognition as at FVPL investments and disposal of AFS financial assets.

For the accounting policy on foreign exchange gain, refer to Note 2.23.

For revenues within the scope of PFRS 15, the following specific recognition criteria must be met before revenue is recognized:

To account for the revenues arising from contracts with customers, the Group applies the following five step model.

- a. Identify the contract(s) with a customer
- b. Identify the performance obligations in the contract
- c. Determine the transaction price
- d. Allocate the transaction price to the performance obligations in the contract
- e. Recognize revenue when (or as) the entity satisfies a performance obligation.

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group concluded that it is acting as principal in all of its arrangements, because it typically controls the goods or services before transferring them to the customer.

The Group recognizes management fees over time over time, using an output method to measure progress towards complete satisfaction of the service, because the customer simultaneously receives and consumes the benefits provided by the Group. Management fees are earned for the provision of asset management services. These services represent a single performance obligation comprised of a series of distinct services which are substantially the same, being provided continuously over the contract period. Management fees are determined based on a fixed percentage of the net asset value of the funds under management.

Amendment fees, cancellation fees and handling fees are recognized as revenue at a point in time, generally upon billing wherein the performance obligation is substantially satisfied.

#### Claims processing fee

Claims processing fees pertain to revenue from management of medical funds of accounts under the Cost Plus Program (CPP) of I-Care. This is recognized as revenue upon payment of claims to accredited hospitals and clinics.

#### 2.20. Operating Expenses

Operating expenses are charged to operations when incurred.

#### 2.21. Retirement Benefit Costs

The net retirement benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Retirement benefit costs comprise the following:

- Service cost; and
- Net interest on the net defined benefit liability or asset.

Service costs (which include current service costs, past service costs, and gains or losses on non-routine settlements) are recognized as expense in the consolidated statements of income. Past service costs are recognized when plan amendment or curtailment occurs.

Net interest on the net retirement benefit liability or asset is the change during the period in the net benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on risk free rates to the net defined pension liability or asset. Net interest on the net retirement benefit liability or asset is recognized as expense or income in the consolidated statements of income.

Re-measurements comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Re-measurements are not reclassified to profit or loss in subsequent periods.

#### 2.22.Leases

#### Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

#### Group as a lessee

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group applies a single recognition and measurement approach for all leases, except for leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

#### 2.22.1. Right-of-Use Asset

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are initially measured at cost, less any accumulated amortization and impairment losses, and adjusted for any remeasurement of lease liabilities. The initial cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, lease payments made at or before the commencement date less any lease incentives received.

Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets is amortized on a straight-line basis over the shorter of the estimate useful life and lease term. Right-of-use assets are subject to impairment. Refer to the accounting policies on impairment of non-financial assets discussed in Note 2.16.

#### 2.22.2. Lease Liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The Group's lease liabilities are included in Accrued Expenses and Other Liabilities (Note 14).

#### 2.22.3. Short-term leases and leases of low-value assets

The Group does not apply the short-term lease recognition exemption (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also does not apply the leases of low-value assets recognition exemption.

#### 2.23. Foreign Currency-Denominated Transactions and Translations

Transactions in foreign currency are initially recorded at the exchange rate at the date of transaction. Foreign currency denominated monetary assets and liabilities are translated using the closing exchange rate at the reporting date. Exchange differences arising from translation of foreign currency monetary items at rates different from those at which they were originally recorded were recognized in the consolidated statements of income.

Foreign exchange gains are presented in the consolidated statements of income under "Operating revenue," and foreign exchange losses are presented as "Other losses" under "Operating expenses."

For income tax reporting purposes, foreign exchange gains or losses are treated as taxable income or deductible expenses, in the period these are realized.

#### 2.24. Income tax

#### 2.24.1. *Final Tax*

Final tax on interest and dividend income is presented in the consolidated statements of income at the time interest is earned.

#### 2.24.2. Current Income Tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that have been enacted or substantively enacted at the reporting date.

#### 2.24.3. Deferred Income Tax

Deferred income tax is provided, using balance sheet liability method, on all temporary differences at the reporting date between the tax bases of deferred income tax assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, including asset revaluations. Deferred income tax assets are recognized for all deductible temporary differences, to the extent that it is probable that sufficient future taxable profits will be available against which the deductible temporary differences, net operating loss carry-over (NOLCO), and excess of minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized.

Deferred income tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profits will allow all or part of the deferred income tax assets to be recovered.

Deferred income tax assets and liabilities are offset if a legally enforceable right exists to offset current income tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

#### 2.25. Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of a past event; (b) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense. When the Group expects a provision or loss to be reimbursed, the reimbursement is recognized as a separate asset only when the reimbursement is virtually certain and its amount is estimable. The expense relating to any provision is presented in the consolidated statements of income, net of any reimbursement.

#### 2.26. Contingencies

Contingent liabilities are not recognized in the consolidated financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but disclosed when

an inflow of economic benefit is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the consolidated financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the consolidated financial statements.

#### 2.27. Events After the Reporting Date

Post year-end events that provide additional information about the Group's position at the reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are non-adjusting events are disclosed in the notes to the consolidated financial statements when material.

### 3. Management's Use of Significant Accounting Judgments and Estimates

The Group uses accounting judgments and estimates that affect the reported amounts of assets and liabilities at the reporting date, as well as, the reported income and expenses for the year. Although the judgments and estimates are based on management's best knowledge and judgment of current facts as at the reporting date, the actual outcome may differ from these estimates, possibly significantly. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable. Judgments and estimates are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### 3.1. Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on amounts recognized in the consolidated financial statements:

#### 3.1.1. Product Classification

The Group has determined that all the products including the VUL insurance contracts it issues that link the payments on the contract to units of an internal investment fund have significant insurance risk and, therefore, meet the definition of an insurance contract and should be accounted for as such. The significance of insurance risk is dependent on both the probability of an insured event and the magnitude of its potential effect.

#### 3.1.2. Classification of HTM investments

The classification to the Held-to-maturity category requires significant judgment. In making this judgment, the Group evaluates its intention and ability to hold such investments to maturity. Financial assets are reclassified out of the HTM category whenever there is change in intention or ability of the Group to hold a financial asset to maturity or when there are sales or reclassifications that are more than an insignificant amount and do not meet the conditions under PAS 39.

#### 3.1.3. Determination of Existence of Significant Influence

The Group's equity investment in Union Bank of the Philippines (UBP) is classified as an associate as the Group has established that it has significant influence over UBP through its representation in the Board of Directors of UBP, the existence of a material transaction between the Group and UBP, and active participation of the representatives of the Group's BOT in the board-level committees of UBP (Note 8).

### 3.1.4. Distinction Between Property and Equipment and Investment Property

The Group determines whether a property qualifies as property and equipment or

investment property. In making its judgment, the Group considers whether the property is held for use in the supply of services, or is held for capital appreciation, and to earn rentals, in which case the property shall be classified as property and equipment or investment property respectively, as the case may be.

There were reclassifications between property and equipment and investment properties amounting to ₱331,863,809 and ₱235,264,777 in 2021 and 2020, respectively (Notes 9 and 10).

#### 3.1.5. Classification of Leases

#### Group as lessor

Leases where the lessor does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same bases as rental income. Contingent rents are recognized as revenue in the period in which they are entered.

#### Group as lessee

The Group has several lease contracts that include extension and termination options. The renewal periods for leases of branches are not included as part of the lease term as the contract renewals are subject to the agreement of both the lessor and the lessee and are therefore legally unenforceable. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

#### 3.2. Estimates

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities follow:

#### 3.2.1. Impairment of AFS Equity Securities

The Group determines AFS equity securities as impaired when there has been a significant or prolonged decline in the fair value of the financial assets below its cost or where other objective evidence of impairment exists. The determination of what is significant or prolonged requires judgment. In making this judgement, the Group considers, among other factors, the normal volatility in share price. In addition, the Group also considers the financial health of the investee, industry and sector performance, changes in technology, and operational and financing cash flows.

The carrying value of the Group's AFS equity securities amounted to \$10,789,676,546\$ and \$11,092,904,691\$ as of December 31, 2021 and 2020, respectively (Note 7).

#### 3.2.2. Adequacy of Legal Policy Reserves

In determining legal policy reserves, best estimates are made as to the policy expense, expected number of deaths, illness, or injury, and also on the number of withdrawing or lapsing policies for each of the years in which the Group is exposed to risk.

These estimates are based on expense, mortality and morbidity, and persistency assumptions based on the Group's actual experience from its latest studies. The estimated number of deaths, illness, or injury and withdrawing or lapsing policies determine the value

of possible future benefits to be paid out, which will be factored into ensuring sufficiency of reserves, which in return is monitored against current and future premiums.

Inclusive in the amount of calculated legal policy reserves are the non-guarantee benefits or the policy dividends. Mortality and lapse assumptions are also factored in the computation of the value of these benefits.

The interest rate used to discount these future cash flows are based on the risk-free discount rate, which are obtained from the following sources:

- (i) For Philippine Peso policies: PHP BVAL Reference rates from Bloomberg as of December 31, 2020 and 2021;
- (ii) For US Dollar policies: International Yield Curve (IYC) from Bloomberg

These yield curve and risk-free discount rates are provided by the IC.

Regulations also mandate provision for Margins for Adverse Deviations (MfAD) to be applied to the above assumptions.

As prescribed by IC, the fixed MfAD are subject to a minimum of:

- (i) Interest: +/- 10% of discount rate;
- (ii) Expense: 10% of best estimate expense;
- (iii)Other assumptions including but not limited to mortality, morbidity, lapse and conversion: +/- 10% of best estimate assumptions.

The sign (positive or negative) of MfAD for mortality, lapse and interest assumptions are tested by product at the time of valuation. The sign that give higher reserves for a product is used in calculation of the liability.

The carrying value of legal policy reserves amounted to P57,763,663,588 and P69,356,604,797 as of December 31, 2021 and 2020, respectively (Note 12).

#### 3.2.3. Estimation of IBNR claims

Estimates have to be made for the expected ultimate cost of IBNR. The Group develops estimates for the IBNR claims using an actuarial process that is centrally controlled. The actuarial models consider the time from the date the insured event occurred to the time the claim was filed.

Total IBNR claims included under "Other insurance liabilities" in the statements of financial position amounted to ₱361,134,205 and ₱394,265,659 as of December 31, 2021 and 2020, respectively (Note 13).

## 3.2.4. Estimation of Retirement Benefits Cost

The cost of defined benefit plans, as well as, the present value of the retirement obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates, and future retirement increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Net retirement benefits asset (liability) amounted to ₱117,223,089 and (₱80,921,907) as of December 31, 2021 and 2020, respectively (Note 24).

### 3.2.5. Realizability of Deferred Income Tax Assets

The carrying amount of deferred income tax assets recognized is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

Deferred income tax assets recognized as of December 31, 2021 and 2020 amounted to P328,260,783 and P3,084,638,707, respectively, while deferred income tax assets were not recognized on NOLCO amounting to P1,408,175,180 and P3,148,792,792 as of December 31, 2021 and 2020, respectively, and excess MCIT over RCIT amounting to P65,320,295 and P53,242,715 as of December 31, 2021 and 2020, respectively (Note 25).

#### 3.2.6. Contingencies

The Group is currently involved in various legal proceedings, including claims for punitive damages, in the normal course of its business. The estimate of the probable costs for the resolution of these claims has been developed in consultation with the legal counsels and based upon an analysis of potential results. The Group, however, does not believe that such litigations, which are common in the insurance industry in general, will have a material effect on its operating results and financial condition.

### 4. Cash and Cash Equivalents

	2021	2020
Cash on hand	₽918,776	₽7,688,055
Cash in banks	1,659,175,562	1,806,305,049
Cash equivalents	3,011,542,419	3,277,120,813
	₽4,671,636,757	₽5,091,113,917

Cash in banks earn interest at the prevailing bank deposit rates. Cash equivalents are made for varying periods of between one day and three months depending on the immediate cash requirements of the Group and earn interest at the prevailing short-term deposit rates.

Cash equivalents earn interest at rates ranging from 0.08% to 1.00% and from 0.05% to 0.70% in 2021 and 2020, respectively.

#### 5. Short-term Investments

As of December 31, 2020, short-term investments amounted to ₱283,733,405 (nil 2021).

Short-term investments represent time deposits with maturities of more than three months but not more than one year from dates of placement and earned interest at annual rates ranging from 0.13% to 0.75% in 2020.

Interest income from short-term investments amounted to ₱4,910,200 in 2020 (see Note 17).

#### 6. Insurance Receivables

	2021	2020
Due premiums	₽222,042,137	₽217,240,495
Reinsurance assets	6,155,379	5,311,021
	₽228,197,516	₱222,551,516

Due premiums are premiums earned which remain unpaid within the statutory defined limit. Premiums due and uncollected represent premiums on in-force policies which are collectible within the Group's grace period.

Reinsurance assets represent balances due from reinsurance companies, which arise from ceded reinsurance arrangements. Reinsurance assets pertains to amounts recoverable from the reinsurers in respect of claims already paid by the Group which are due and demandable.

# 7. Financial Assets

The Group's financial assets, excluding cash and cash equivalents, are summarized by measurement categories below:

	2021	2020
Financial assets at FVPL	<b>₽</b> 41,154,360,019	₽36,306,342,905
AFS financial assets	66,898,148,180	63,392,958,776
HTM financial assets	179,206,563	429,868,005
Loans and receivables	11,225,284,259	13,104,539,075
	<b>₽</b> 119,456,999,021	₽113,233,708,761

The financial assets included in each of the categories above are detailed below:

## 7.1. Financial Assets at FVPL

The financial asset at FVPL under separate fund is comprised of:

	2021	2020
Equity securities - quoted	₽1,332,687,694	₽3,393,768,696
Under separate funds:		
Traditional VULs:		
Cash and cash equivalents	869,283,185	2,468,026,878
Equity securities – quoted	22,487,066,910	20,736,532,042
Debt securities – quoted		
Government:		
Local currency	3,831,982,188	2,668,455,377
Foreign currency	2,260,793,881	2,650,582,154
Corporate:		
Local currency	424,888,203	480,323,984
Foreign currency	36,414,433	214,621,990
Investment in unit investment trust fund		
(UITF)		

(Forward)

	2021	2020
Local currency	₽7,450,366,988	₱2,192,060,254
Foreign currency	2,051,280,161	296,213,353
Other receivables	253,486,767	153,746,033
Other payables	(92,765,512)	(110,554,837)
Structured VULs:		
Local currency	_	455,041,000
Foreign currency	248,875,121	707,525,981
	39,821,672,325	32,912,574,209
	<del>P</del> 41,154,360,019	₽36,306,342,905

Quoted equity securities represent preferred listed in the stock exchange and investments in mutual funds. Fair value gains on these equity securities amounted to ₱8,638,030 and ₱94,052,640 in 2021 and 2020, respectively.

The portion of the segregated fund assets attributable to the seed capital of the Group amounted to ₱1,363,989,817 and ₱1,449,226,239 as of December 31, 2021 and 2020, respectively.

Fair value gains (losses) included in the carrying amounts of FVPL financial assets presented in the separate financial statements of VUL funds (i.e., inclusive of fair value gains and losses attributable to the Group and the policy holders) amounted to ₱1,913,950,487 and (₱1,710,099,821) for the years ended December 31, 2021 and 2020, respectively. These financial assets are designated as FVPL in accordance with the investment strategy and valuation provisions of the VUL insurance contracts. Likewise, the valuation basis of reserves for VUL policies held by policyholders is consistent with the reserves valuation methodology set for VUL insurance contracts.

## **Traditional VULs**

# Cash and cash equivalents

Cash in banks earns interest at the prevailing bank deposit rates. Short-term deposits are made for varying periods not exceeding three months depending on the immediate cash requirements of the funds, and earn interest at the prevailing short-term deposit rates.

### Equity securities

Equity securities under the separate fund are includes quoted equity securities traded in the Philippine Stock Exchange.

### Government debt securities

Interest rate for peso government debt securities under FVPL ranged from 0.00% to 8.00% both in 2021 and 2020. Interest rate for dollar bonds ranged from 2.65% to 10.63% in 2021 and from 2.46% to 10.63% in 2020.

#### Corporate debt securities

Corporate debt securities include bonds issued by reputable counterparties. Interest rate for peso corporate debt securities under FVPL is from 3.00% to 5.25% in 2021 and 3.00% to 6.10% in 2020. Interest rate for dollar bonds is 2.50% in 2021 and is from 2.13% to 4.38% in 2020.

#### Investment in Unit Investment Trust Fund

Unit investment trust fund (UITF) is an open-ended pooled trust fund denominated in peso and dollar, operated and administered by a trust entity and made available by participation.

#### Other receivables

Other receivables are comprised of accrued interest income from government and corporate debt securities and accrued dividend income from equity securities.

#### Other payables

Other payables are comprised of custodial fee, fund administration fee, professional fees, and taxes that remain unpaid as of year-end.

#### Structured VULs

Structured VULs are structured notes issued by Global Issuers and constitute direct, unconditional, unsubordinated, and unsecured obligation of the Issuer.

#### 7.2. AFS Financial Assets

AFS financial assets are comprised of:

	2021	2020
Equity securities:		
Quoted	<b>₽</b> 10,388,632,154	₽10,716,229,670
Unquoted	401,044,392	376,675,021
	10,789,676,546	11,092,904,691
Debt securities:		_
Quoted:		
Government:		
Local currency	38,687,389,469	₽33,571,331,606
Foreign currency	1,066,840,895	1,202,189,063

The reserve for fluctuation in value of AFS financial assets includes debt securities that the Group reclassified from AFS to HTM financial assets on September 15, 2008. At the date of reclassification, the amortized cost and fair value of the debt securities amounted to ₱283,501,557 and ₱343,106,120, respectively. The difference of fair value and amortized cost as of date of reclassification amounting to ₱59,604,563 was taken directly to equity and is being amortized until maturity. The yield-to-maturity from the debt securities is 10.41%. In 2019, the Group reclassified all its HTM debt securities to AFS, including these securities that were reclassified to HTM in 2008.

The amortization of unrealized gain from the financial asset reclassified in 2008 follows:

	2021	2020
Beginning balance	₽24,112,538	₱28,955,961
Amortization	(5,354,397)	(4,843,423)
Ending balance	₽18,758,141	₽24,112,538

As of December 31, 2021 and 2020, government securities totaling ₱325,000,000 are deposited with the IC in accordance with the provision of the Code as security for the benefit of policyholders and creditors of the Group. The amount represents 25% of required minimum capital as mandated by IC.

## 7.3. HTM Financial Assets

The details of HTM financial assets of the Group as of December 31 follow:

	2021	2020
Government	₽159,206,563	₽389,868,005
Corporate	20,000,000	40,000,000
	₽179,206,563	₽429,868,005

#### 7.4. Loans and Receivables

	2021	2020
Term loans	₽2,841,125,000	₽4,474,750,000
Policy loans (net of unearned interest income)	4,787,613,601	5,064,446,030
Accounts receivable	1,576,847,958	1,526,429,474
Unquoted debt security	793,120,000	862,080,000
Interest receivable	591,050,620	695,373,684
Housing loans	102,016,791	113,862,868
Car financing loans	18,326,961	22,454,415
Mortgage loans	29,522,736	34,546,814
Due from agents	33,156,319	18,630,328
Others	551,977,953	333,296,118
	11,324,757,939	13,145,869,731
Allowance for impairment loss (Note 31)	(99,473,680)	(41,330,656)
	₽11,225,284,259	₱13,104,539,075

The classes of loans and receivables of the Group follow:

Term loans pertain to investments in fixed-rate loans of corporate borrowers with terms ranging from 7 to 10 years both 2021 and from 7 to 15 years in 2020. Interest rates range from 4.00% to 6.27% in 2021 and from 4.00% to 10.35% in 2020.

• Policy loans pertain to loans granted to policyholders. The loan is issued with the cash surrender value of the policyholder's insurance policy as collateral. Interest rates on policy loans range from 6.00% to 14.00% in both 2021 and 2020. Policy loans as of December 31 follows:

	2021	2020
Policy loans – gross	<b>₽</b> 5,068,748,350	₽5,358,286,294
Unearned interest income	(281,134,749)	(293,840,264)
Policy loans – net	₽4,787,613,601	₽5,064,446,030

- Accounts receivable pertain to miscellaneous receivables from employees, agents, related parties and third parties.
- Unquoted debt security pertains to a fixed rate callable amortizing green bond issued by the International Finance Corporation. Interest on bonds is payable semi-annually in arrears at an annual interest of 6.34%.
- Interest receivable pertains to accrued interest arising from investments in AFS debt securities, cash equivalents, term loans, housing loans, mortgage loans and other receivables.
- Housing loans pertain to long-term loans granted to employees at an annual interest of 8.00% payable semi-monthly with terms ranging from 6 to 20 years.
- Car financing loans pertain to car loans granted to employees at an annual interest of 6.00% payable semi-monthly with terms ranging from 5 to 7 years.
- Mortgage loans pertain to housing loans granted to third parties and former employees with terms ranging from 7 to 15 years. Interest rates on these loans range from 6.00% to 18.00% in 2021 and from 7.50% to 9.00% in 2020.
- Due from agents pertains to advances by agents, unremitted collections, and charges for amendment/replacement of policies.
- Others include membership fee receivables and receivable from members.

Day 1 loss was recognized on loans with off-market interest rates. The nominal amount of these loans as of December 31 follows:

	2021	2020
Housing loans	₽119,384,837	₽133,780,467
Less: unamortized deferred interest income	17,368,046	19,917,599
	102,016,791	113,862,868
Car financing loans	22,247,605	26,569,658
Less: unamortized deferred interest income	3,920,644	4,115,243
	18,326,961	22,454,415
	<b>₽120,343,752</b>	₽136,317,283

The amortization of deferred interest income amounting to ₱3,776,097 and ₱4,401,327 in 2021 and 2020, respectively, is recognized as part of interest on loans and receivables included under "Investment income" in the statements of income (Note 17).

The reconciliation of changes in allowance for impairment on loans and receivables follows:

			2021		
	Accounts Receivable	Mortgage loans	Due from agents	Others	Total
Beginning balances	₽22,975,880	₽168,078	₽2,189,149	₽15,997,549	₽41,330,656
Provision, net of reversal	59,580,329	375,694	(534,048)	(1,278,951)	58,143,024
<b>Ending balances</b>	₽82,556,209	₽543,772	₽1,655,101	₽14,718,598	₽99,473,680
			2020		
	Accounts	Mortgage	Due from		
	Receivable	loans	agents	Others	Total
Beginning balances	₽5,148,724	₽104,264	₽1,398,086	₽7,458,645	₽14,109,719
Provision, net of reversal	17,827,156	63,814	791,063	8,538,904	27,220,937
Ending balances	₽22,975,880	₽168,078	₱2,189,149	₽15,997,549	₽41,330,656

The balances above were identified by the Group using the individual and collective impairment assessment.

## 8. Investment in Associates

This account consists of investments in the following entities, which are all incorporated and operating in the Philippines, as of December 31, 2021:

	Incorporation Date	Nature of Business
PPVI	December 9, 1975	Development and sale of real estate
MIIC	September 1, 1934	Provision of nonlife general insurance
UBP	August 16, 1968	Universal commercial banking

The shares of stock of UBP are traded in the local stock market. The fair value of the Group's interest in the equity securities of UBP amounted to ₱20,808,943,843 (i.e., ₱99.50 per share) and ₱14,271,097,528 (i.e., ₱71.90 per share) as of December 31, 2021 and 2020, respectively.

On various dates in 2007, UBP issued a total number of 90,176,456 shares of stock to its equity holders. The Group did not subscribe for additional shares thereby reducing its interest in UBP from 18.74% to 16.11%. The reduction in interest in UBP deemed as disposal was accounted for using the entity concept method and recognized the deemed disposal of interest as an equity transaction. Thus, dilution gain arising from the deemed disposal of interest in UBP amounting to \$\mathbb{P}\$304,954,486 was recognized as "Premium on deemed disposal of investment in an associate" in the members' equity section of the consolidated statements of financial position.

On various dates in 2020, the Group sold 276,680 shares for  $$\mathbb{P}18,686,385$$  decreasing its interest in UBP from 16.32% in 2019 to 16.29% in 2020. On various dates in 2021, the Group sold 31,177,270 shares for  $$\mathbb{P}2,481,589,362$$  decreasing its interest in UBP from 16.29% in 2020 to 13.72% in 2021.

The Group is allowed to continue to apply PAS 39 in accounting for financial instruments and is permitted to apply equity method of accounting based on the financial statements of associates that applied PFRS 9 as allowed under Amendments to PFRS 4.

Beginning January 1, 2018, UBP adopted PFRS 9 which introduces new requirements for classification and measurement, impairment and hedge accounting. Under PFRS 9, the classification of financial assets is based on an entity's business model for managing the financial assets; and whether the financial instrument's contractual cash flows represent "solely payments of principal and interests" or "SPPI" on the principal amount outstanding. The adoption of PFRS 9 also fundamentally changed the UBP's measurement of impairment losses for financial assets – from PAS 39's incurred loss approach to a forward-looking expected credit loss (ECL) approach. Under PFRS 9, entities are required to provide ECL for financial assets at AC, FVOCI and contract assets. The allowance is based on the ECLs associated with the risk of default in the next twelve months unless there has been a significant increase in credit risk since origination or the financial assets are impaired where lifetime ECL is provided. For trade receivables without significant financing component, the simplified approach is applied in calculating ECLs. Therefore, UBP no longer tracks changes in credit risk but instead recognizes an allowance based on lifetime ECL at each reporting period. Relevant forward-looking factors specific to the debtors and the economic environment are considered in developing the overlays in the ECL calculation.

UBP has commitments and contingent accounts amounting to ₱244.87 billion and ₱229.98 billion as of December 31, 2021 and 2020 respectively. These primarily pertain to guarantees and commitments to extend credit which are part of the regular operations of a bank, trust department accounts and forward and spot exchange transactions. UBP recognizes in its books any losses and liabilities incurred in the course of its operations as soon as these become determinable and quantifiable. MIIC has no contingent liabilities or capital commitments as of December 31, 2021 and 2020. MIIC is not subject to restrictions (i.e., whether through legal, contractual, or discretionary restrictions) as to the use or transfer of itsassets or settlement of liabilities as of December 31, 2021 and 2020.

MIIC is subject to statutory regulations on capital requirements (Note 32). MIIC submits annual financial statements to the IC to determine adequacy of the MIIC's investments. IC classifies assets according to admitted and non-admitted assets for the purpose of calculating financial ratios that MIIC is required to maintain. These, among others, may pose restrictions as to the use or transfer of assets, as well as, the settlement of liabilities as of December 31, 2021 and 2020.

BSP, UBP's lead regulator, sets and monitors the capital requirements of UBP. In implementing current capital requirements, the BSP requires UBP to maintain a minimum capital amount and a prescribed ratio of qualifying capital to risk-weighted assets, known as the "capital adequacy ratio". Risk-weighted assets is the aggregate value of assets weighted by credit risk, market risk, and operational risk, based on BSP-prescribed formula provided under its circulars. These, among others, may impose significant restrictions as to the use or transfer of assets or the settlement of liabilities as of December 31, 2021 and 2020.

NT - TO 1 TT 1			76 11 1 110 100

The total fair value of the investment properties amounted to ₱12,315,750,678 and ₱8,128,897,313 as of December 31, 2021 and 2020, respectively, based on independent appraiser valuation.

₽3,536,995,746 ₽2,877,422,446 ₽6,414,418,192

The fair value hierarchy of the investment properties is under Level 3 category. The fair value of the investment properties was arrived at using the following approaches:

	Valuation Technique	e	Significant Unobservable Inputs
Land	Market Data	•	Sales price
	approach	•	Location and proximity to important landmarks
		•	Marketability and desirability
Building and	Cost approach	•	Replacement cost or reproduction cost
Improvements		•	Condition and economic life
		•	Facilities and amenities

Market Data approach is a comparative approach that considers the sales of similar or substitute assets and other related market data. In general, an asset being valued is compared with similar items that have been transacted in the market or that are listed or offered for sale, with appropriate adjustment to reflect different properties or characteristics. Market data considered in the valuation includes location of the properties, size, shape and characteristics of the lot, desirability in the market and present and prospective use.

Cost approach is a comparative approach used to estimate the replacement cost or reproduction cost of the building and improvements, considering the prevailing market prices for material, labor, contractor's overhead, profit and other charges, less allowance for physical depreciation and obsolescence.

Highest and best use is defined as the most probable use of a property, which is physically possible, appropriately justified, legally permissible, financially feasible, and which results in the highest value of the property being valued.

Movements in the significant unobservable inputs are positively correlated to the fair value of the properties subject to valuation.

The Group enters into operating leases for its investment properties (Note 27). Rental income amounted to ₱680,268,475 in 2021 and ₱728,714,363 in 2020 (Note 27). Direct expenses arising in respect of such investment properties amounted to ₱183,312,178 in 2021 and ₱121,224,474 in 2020 while indirect operating expenses amounted to ₱21,910,602 in 2021 and ₱23,518,057 in 2020 (Note 21).

Future minimum lease rentals receivable under non-cancellable operating leases are disclosed in Note 27.

As discussed under Note 2, legal policy reserves reflect the statutory reserves calculated based on the Gross Premium Valuation method.

# 13. Other Insurance Liabilities

	2021	2020
Members' deposits and other funds on deposit		
Subscriptions to variable unit-linked funds	₽38,457,682,509	₽31,463,347,970
Reserve for dividends to members	4,682,366,180	4,858,455,735
Advances from policyholders	736,394,992	574,957,783
Claims pending settlement	2,761,390,695	3,033,949,919
Incurred but not yet reported	361,134,205	394,265,659
	<b>₽</b> 46,998,968,581	₽40,324,977,066

Claims pending settlement pertains to approved but unpaid claims. Incurred but not reported (IBNR) claims are claims that already occurred but notice had not been received by the Group and which is based on a reasonable estimate of unreported claims based on Company's historical experience.

The liabilities are not subjected to covenants and warranties.

# 14. Accrued Expenses and Other Liabilities

	2021	2020
Accounts payable and other accrued expenses	₽1,174,894,755	₽867,448,546
Accrued employee benefits	509,016,272	449,597,935
Remittances not yet allocated	235,555,252	201,431,290
Commissions payable	126,576,683	156,810,683
Taxes payable	121,233,517	104,388,790
Lease liability	36,210,640	25,097,392
Others	15,828,140	23,333,544
	₽2,219,315,259	₱1,828,108,180

The classes of other liabilities of the Group follow:

- Accounts payable pertain to amounts due to contractors and suppliers.
- Accrued employee benefits pertain to various unpaid short term employee benefits such as vacation leave, sick leave, service awards, and other benefits offered by the Group to its employees.
- Remittances not yet allocated pertain to new business deposits with pending underwriting requirements and collections from policyholders unapplied to their corresponding receivable set-up as of reporting date.

## 15. Members' Equity

On November 28, 2019, the Board of Trustees appropriated ₱350,000,000 out of its retained earnings as of December 31, 2019, in compliance with increased minimum member's equity of ₱900,000,000 as required under IC CL No. 2017-14, *Minimum Members' Equity Requirements for Mutual Companies*, as amended by IC CL No. 2019-67, and Amended Insurance Code which is valid until December 31, 2021.

On November 4, 2020, Insular Life appropriated ₱600,000,000 out of its Retained Earnings as of December 31, 2020, to increase the Group's appropriation for its Total Members' Equity to ₱1,500,000.000. This is more than the required total Members' Equity of ₱1,300,000,000 and ahead of the deadline on December 31, 2022 under IC CL No. 2017-14 as amended by IC CL No. 2019-67. See Note 30 for the schedule of minimum total members' equity as required by IC.

On November 25, 2021, the Board of Trustees appropriated ₱1,000,000,000 out of its Retained Earnings as of December 31, 2021 for technology initiatives thereby increasing the Group's appropriation for its Total Members' Equity to ₱2,500,000.000.

# 16. Insurance Revenue

	2021	2020

	₽1,346,927,915	₽1,403,797,073

#### 24. Retirement Benefits

The Group accrues the provision for retirement benefits covering all of its regular employees based on the Group's retirement plan that is compliant with the provision of Republic Act (RA) No. 7641. The benefits are based on the years of service and compensation of the employees.

The retirement plan of the Parent Company is administered by The Insular Life Assurance Co., Ltd. Employees' Retirement Plan. The Retirement Committee of Insular Life has the following major responsibilities as provided in the declaration of trust:

1) Control and administration of the retirement plan for the accomplishment of the purpose for which the Fund is intended in accordance with the plan; and

<sup>&</sup>quot;Investment management expenses" includes interest expense from lease liability amounting to \$\mathbb{P}1,778,050\$ and \$\mathbb{P}1,743,538\$ in 2021 and 2020, respectively (Note 27). This also includes commissions paid to securities brokers.

2) Receive and hold title to and ownership of the fund to be held in trust for the best interest of the parties affected thereby in accordance with and for all the uses and purposes as stated in the plan and in the declaration of trust (with all the powers and duties as stated in the declaration of trust).

The subsidiaries' retirement funds are administered by UBP under the supervision of the Retirement Committee of the respective plans. The Retirement Committee of the subsidiaries' plans is responsible for the investment strategy of the plans.

Effective January 1, 2020, the Company amended the Insular Life Assurance Co., Ltd. Employees' Retirement Plan from a hybrid (defined contribution with defined benefit guarantees) retirement plan to a defined benefit retirement plan.

Under the amended plan, the credited monthly salary is equivalent to the latest month basic salary in contrast to the old plan whereby it is equivalent to the latest monthly basic salary multiplied by 14/12.

Under the amended plan, the eligibility for normal retirement is age 65 (effective one day after the 65<sup>th</sup> birthday) with benefit equivalent to 175% of the Plan salary per year of credited service. Moreover, eligibility for early retirement is age 50 and 10 years of service, subject to the consent of the Company with benefit equivalent to the applicable percentage of the Plan salary depending on the years of service. For death benefit feature of the amended plan, the benefit granted is equivalent to 175% of the Plan salary for every year of credited service.

The effect of the change in retirement plan is reflected as past service cost and recognized immediately in the 2020 retirement expense.

The tables below summarize the components of retirement benefits cost recognized in the consolidated statements of income and the funded status and amounts recognized in the consolidated statements of financial position for the retirement plans.

a. Retirement benefits expenses recognized in the consolidated statements of income follow:

	2021	2020
Current service cost	₽102,912,248	₽93,867,070
Past service cost	_	145,040,733
Net interest income	3,336,347	3,133,464
Retirement benefits expense	₽106,248,595	₽242,041,267

b. Net retirement benefits liability (asset) recognized in the consolidated statements of financial position follow:

	2021	2020
Fair value of net plan assets	<b>(₱1,278,937,100)</b> (₱	21,486,549,471)
Present value of defined benefit obligation	1,161,714,011	1,567,471,378
Retirement benefits liability (asset)	(₱117,223,089)	₽80,921,907

The net retirement benefit liability (asset) as presented in the consolidated statements of financial position follow:

Debt securities:				
Government	728,744,122	58%	747,617,458	50%
Private	256,239,238	20%	143,300,554	10%
	984,983,360	78%	890,918,012	60%
Fair value of plan assets	<b>₽</b> 1,259,601,460	100%	₽1,488,042,893	100%

<sup>\*</sup>Excluding liabilities amounting to P2,443,847 and P1,493,422 for 2021 and 2020, respectively.

All equity and debt securities held have quoted prices in an active market. The plan assets have significant concentration on the sovereign debt of the Philippines.

The Parent Company's Retirement Committee reviews the level of funding of the Parent Company's pension plan annually. The said review includes, among others, asset-liability matching (ALM) and investment strategy. The principal objective of the Parent Company's ALM is to ensure the expected return on plan assets to be sufficient to support the desired level of funding arising from the projected maturity profile of the defined benefit plans. The Retirement Committee decides to gear towards investing in fixed income securities based on a matrix of allowable types of investments maintained by the Parent Company. For fixed income instruments, government securities with tenors of one to three years and more than three years may account for up to 30% and 80% of the portfolio, respectively, while treasury bills can consist of up to 10%. Corporate issues with maturities of five years and less and those more than five years may comprise up to 15% and 10% of the portfolio, respectively. Investments in equities are allowed up to 20%, and cash and cash equivalents can reach up to 10% of the portfolio, except in certain circumstances as approved by the Retirement Committee.

The latest actuarial valuation of the plan is as of December 31, 2021. The principal actuarial assumptions used to determine retirement benefits costs follow:

	2021	2020
Discount rate*	4.99% - 5.08%	3.82% - 3.90%
Future salary increases	4.00% - 5.00%	4.00% - 5.00%

<sup>\*</sup> This is the single weighted average discount rate which is based on BVAL reference rates at various tenors as of December 31, 2021 and of December 29, 2020, respectively. Rates for intermediate durations were interpolated.

The Group contributed P158,444,196 to its defined benefit plan in 2021 and expects to contribute P78,731,928 to its defined benefit plan in 2022.

The discount rate and salary increase rate were identified as significant actuarial assumptions. The shi analysis below has been determined based on methods that extrapolate the impact in the Group's defined benefit obligation as of December 31 as a result of reasonably possible changes in each significant assumption, assuming all other assumptions were held constant. The below amounts disclosed shows the defined benefit obligation balance as of December 31 depending on the changes in the assumptions:

	Group		
	2021	2020	
Discount rate:		_	
Increase of 1%	<b>(₽110,218,028)</b>	(₱139,764,829)	
Decrease of 1%	129,682,115	165,197,699	
Salary increase rate:			
Increase of 1%	134,278,199	169,974,705	
Decrease of 1%	(116,069,317)	(146,583,912)	

Shown below is the maturity analysis of the undiscounted benefit payments as of:

	Group		
	2021	2020	
Less than 1 year	₽73,971,694	₽87,234,764	
1 year to less than 5 years	343,585,355	526,578,929	
5 years to less than 10 years	640,391,924	772,071,914	
10 years to less than 15 years	766,330,462	754,827,184	
15 years to less than 20 years	861,726,008	756,281,228	
20 years and above	2,304,888,243	2,370,382,301	
	₽4,990,893,686	₽5,267,376,320	

The range of the average duration of the defined benefit obligation at the end of the reporting period is 18.00 years to 18.01 years and 17.36 years to 19.96 years in 2021 and 2020, respectively.

# 25. Income Taxes

a. The components of provision for income tax follow:

<sup>\*</sup>Statutory income tax rate is 25% and 30% for 2021 and 2020, respectively

#### Relevant Tax Regulations

Corporate Recovery and Tax Incentives for Enterprises (CREATE) Bill

As a result of the changes brought about by CREATE, applicable tax rates for future taxable and deductible amounts for purposes of deferred tax measurement were reduced from 30% to 25%.

This resulted in a reduction in the provision for current income tax in 2021 by ₱11.90 million that is recognized in the 2021 statement of income. In addition, as a result of the change in the tax rate, the deferred tax balances have been remeasured from 30% to 25%, resulting in reduction in net deferred tax asset of ₱516.04 million, increase in provision for deferred income tax by ₱85.52 million in the 2021 statement of income, and decrease in other comprehensive income by ₱601.56 million in the 2021 statement of comprehensive income.

The following are the relevant tax regulations affecting the Group:

### Income Tax

- (a) MCIT, computed at 1% gross income from July 1, 2020 to June 30, 2023, net of allowable deductions as defined under the tax regulations, or to RCIT of 25% effective July 1, 2020, whichever is higher;
- (b) NOLCO can be claimed as deductions against taxable income within three years after NOLCO is incurred. The excess of the MCIT over income tax due may be carried over to the three succeeding taxable years and credited against income tax due provided the Bank is in RCIT position. On September 30, 2020, the BIR issued Revenue Regulations No. 25-2020 implementing Section 4(bbbb) of Bayanihan to Recover as One Act which states that the NOLCO

incurred for taxable years 2020 and 2021 can be carried over and claimed as a deduction from gross income for the next five (5) consecutive taxable years immediately following the year of such loss.

# 26. Related Party Transactions

Enterprises and individuals that directly, or indirectly through one or more intermediaries, control or are controlled by or under common control with the Group, including holding companies and subsidiaries, are related parties of the Group. Associates and individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the enterprise, key management personnel, including directors and officers of the Group and close members of the family of these individuals, and companies associated with these individuals also constitute related parties. In considering each possible related entity relationship, attention is directed to the substance of the relationship and not merely the legal form.

Transactions and balances between the Parent Company and the subsidiaries have been eliminated in the consolidation.

Transactions with related parties consist mainly of:

a. Lease of office spaces, cash advances, dividends, interests, and loans. The balances as of and for the years ended December 31, 2021 and 2020 are presented below:

<sup>\*</sup>The Parent Company's subsidiaries are disclosed in Note 28. Transactions with subsidiaries are eliminated upon consolidation.

b. The investment in UBP subordinated notes of \$\mathbb{P}\$300,000,000 outstanding as of December 31, 2019 was fully redeemed when UBP exercised its call option by way of voluntary redemption in February 2020.

This investment earned interests amounting to ₱2,194,792 2020.

In February 2020, the Group invested in subordinated notes issued by UBP and was classified as AFS financial assets for the same face value of ₱300,000,000. The carrying value of this subordinated note is ₱272,004,284 and ₱295,396,086 in 2021 and 2020, respectively.

This investment earned interests amounting to ₱15,750,000 and ₱13,431,250 in 2021 and 2020, respectively.

c. Key management personnel include all officers that have ranks of vice president and up. Compensation of key management personnel is summarized below:

	2021	2020
Salaries and other short-term employee benefits	₽304,785,841	₽320,397,995
Post-employment and other long-term benefits	29,434,192	32,005,310
	₽334,220,033	₽352,403,305

#### 27. Lease Commitments

The Group has entered into noncancelable leases with terms ranging between one month and fifteen years, both as lessee and as lessor. Most leases include a clause to enable upward revision of the rental charge on an annual basis based on contract.

# a. Group as lessee

The Group has lease contracts for its branches and offices. Leases of its branches and offices generally have lease terms between 1 and 5 years. Generally, the Group is restricted from assigning

and subleasing the leased assets. There are several lease contracts that include extension and termination options and variable lease payments.

The following are the amounts recognized in statement of income:

	2021	2020
Depreciation expense of right-of-use assets included		
in property and equipment	<b>₽</b> 26,127,423	₽26,649,937
Interest expense on lease liabilities (Note 21)	1,778,050	1,743,538
Total amount recognized in statement of income	₽27,905,473	₽28,393,475

The rollforward analysis of lease liabilities follows:

	2021	2020
Beginning balance	<b>₽25,097,392</b>	₽32,719,753
Additions	35,556,382	15,893,103
Interest expense	1,778,050	1,743,538
Payments	(26,221,184)	(25,259,002)
Ending balance	₽36,210,640	₽25,097,392

Shown below is the maturity analysis of the undiscounted lease payments:

	2021	2020
1 year	₽18,280,856	₽11,859,013
more than 1 year to 2 years	7,366,244	5,221,121
more than 2 years to 3 years	4,059,272	3,990,113
more than 3 years to 4 years	3,194,865	2,253,078
more than 5 years	1,603,053	1,954,011
	<del>P</del> 34,504,290	₽25,277,336

## b. Operating lease commitments - the Group as lessor

The future minimum rentals receivable under non-cancelable operating leases follows:

	2021	2020
Within one year	₽347,465,479	₱393,184,309
more than 1 year to 2 years	246,993,040	199,494,725
more than 2 years to 3 years	125,558,440	80,912,982
more than 3 years to 4 years	43,889,965	16,347,206
more than 5 years	7,584,772	2,980,188
	₽771,491,696	₽692,919,410

Rent income recognized in 2021 and 2020 amounted to ₱680,268,475 and ₱728,714,363, respectively. The lease terms of the Group's non-cancelable operating leases range from 6 months to 12 years.

# 28. Group Information

The Group comprises the Parent Company and its subsidiaries. Among the Group's subsidiaries, IIC and ILMADECO are intermediate parents of their respective subsidiaries. IPI and IPVI are whollyowned subsidiaries of IIC; while, ILACGA is a wholly-owned subsidiary of ILMADECO.

The Parent Company's subsidiaries are all incorporated and based in Philippines (i.e., principal place of business). The Parent Company's subsidiaries are engaged in the following activities:

Subsidiaries	<b>Date of Incorporation</b>	Nature of Business
IIC	September 5, 1989	Investment banking in the areas of corporate finance, money market, and securities
		finance, money market, and securities
		underwriting
<ul><li>IPI</li></ul>	May 31, 1994	Development and sale of real estate
<ul><li>IPVI</li></ul>	May 31, 1994	-do-
I-Care	October 14, 1991	Provision of medical and managed care services and
	,	facilities to its members
ILMADECO	March 9, 1987	Holding organization of ILACGA
<ul> <li>ILACGA</li> </ul>	November 11, 2003	Provision of nonlife general insurance
ILPHI	March 23, 1988	Provision of nonlife general insurance Development and sale of real estate

For the relevant corporate information of the Group's associates, refer to Note 8.

The Parent Company is subject to statutory regulations on Risk-Based Capital (RBC2) and other externally imposed capital requirements (Note 32). All asset investments of the Parent Company require approval from the IC. The Parent Company submits annual financial statements to the IC to determine adequacy of the Parent Company's investments. IC classifies assets according to admitted and non-admitted assets for the purpose of calculating financial ratios that the Parent Company is required to maintain. These, among others, pose restrictions as to the use or transfer of assets within the Group, as well as, the settlement of liabilities as of December 31, 2021 and 2020.

The Parent Company is not subject (i.e., under guarantyship, suretyship, or other similar arrangements) to any contingent liability, or capital or purchase commitments as of December 31, 2021 and 2020.

The subsidiaries, except I-Care, have no contingent liabilities or capital commitments as of December 31, 2021 and 2020 and are not subject to restrictions (i.e., whether through legal, contractual, or discretionary restrictions) as to the use or transfer of their assets within the Group, or settlement of liabilities.

IC, I-Care's lead regulator, sets and monitors the capital requirements of I-Care. In implementing current capital requirements, the IC requires I-Care to maintain a minimum capital amount, minimum deposit to IC, minimum net worth, prescribed acid test ratio and a prescribed ratio of qualifying capital to gross membership fees. These, among others, may impose significant restrictions as to the use or transfer of assets or the settlement of liabilities as of December 31, 2021 and 2020.

While IIC is subject to the minimum capital requirements imposed by SEC, the compliance with the said regulation does not pose significant restrictions as the use or transfer of assets within the Group or the settlement of liabilities as of December 31, 2021 and 2020.

On March 8, 2018, the BOD approved, and the stockholders of the respective entities confirmed and ratified to shorten the term of IIC, IPI, IPVI and ILPHI's corporate life from the date of incorporation until December 31, 2019. On February 13, 2019, the BOD approved, and the stockholders confirmed

and ratified, to extend the intended end date of corporate life of IIC, IPI, IPVI, and ILPHI from December 31, 2019 to March 31, 2020 to consider the necessary regulatory process and approval.

With the completion of ILPHI's closure upon the receipt of its certificate of no outstanding tax liability from BIR last November 5, 2020, the BOD then approved and adopted the resolution for the closure of its current bank account on December 3, 2020. The balance of ILPHI's current account amounting to P14,187,182 was transferred to the Parent Company on December 14, 2020.

On August 19, 2020 and September 9, 2020, the BOD approved, and the stockholders confirmed and ratified to shorten the term of ILACGA corporate life from the date of incorporation until March 31, 2022. On May 21, 2021, the BOD approved, and the stockholders confirmed and ratified, to extend the intended end date of corporate life of IIC from March 31, 2020 to May 31, 2022 to consider the necessary regulatory process and approval.

#### 29. Other Income

Other income includes management fees, amendment fees, cancellation fees, handling fees and guarantee fees.

#### 30. Fair Value Measurement

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

The following are short term in nature; hence, the carrying value approximates the fair value:

- Cash and cash equivalents;
- Short term investments;
- Insurance receivable;
- Loans and receivable under "Financial assets" account including:
  - Policy loans;
  - Accounts receivable;
  - Interest receivable;
  - Due from agents; and
  - Other receivables;
- Other insurance liabilities; and
- Accrued expenses and other liabilities excluding taxes and other statutory liabilities.

#### Equity Securities

The fair values of equity securities are based on closing prices as published by the PSE. Fair value of the unquoted equity securities are not material.

#### Investment in Unit Investment Trust Fund (UITF)

Fair values of Investment in UITF are based on Net Asset Value per unit released by the counterparty based on the performance of the fund.

#### **Debt Securities**

The fair values of debt securities are based on quoted prices. For unquoted debt securities, where fair value is not reasonably determinable, fair values are estimated using the discounted cash flow technique that makes use of market rates.

#### Structured VULs

The fair value of structured notes has been computed by counterparties using present value calculations and option pricing models as applicable. The valuation requires management to make certain assumptions about the model inputs particularly the credit spread of the issuer.

## Term, Mortgage, Housing and Car Financing Loans

For disclosure purposes, fair values of these loans are estimated using the discounted cash flow technique that makes use of the Group's incremental lending rates for similar types of instruments.

# Legal Policy Reserves

The carrying amounts of legal policy reserves reflect the statutory reserves.

The following tables show analysis of financial instruments at fair value by level of the fair value hierarchy as of December 31:

			2021

	2021	2020
AFS financial assets:		_
Beginning balance	<b>₽</b> 19,024,806	₽19,673,328
Fair value loss	(290,078)	(648,522)
Ending balance	₽18,734,728	₽19,024,806

In 2021 and 2020, no transfers were made among the three levels in the fair value hierarchy.

### Investment in a holding company

The Group has investments in a holding company's (the "investee-holding company") shares of stock included in available-for-sale investments which are not quoted in the market as of December 31, 2021 and 2020. The investee-holding company was valued using adjusted net asset method in 2021 and 2020 since majority of its net assets are carried at fair value. The carrying value of the investment in a holding company amounted to ₱18,734,728 and ₱19,024,806 as of December 31, 2021 and 2020, respectively. Increases (decreases) in the net book value per share would result in a higher (lower) fair value measurement.

## Structured VULs

Fair value of structured notes has been computed by counterparties using present value calculations and option pricing models as applicable. The management performs an independent testing to validate the reasonableness of counterparty values. The sensitivity analysis requires management to make certain assumptions about the model inputs particularly the credit spread of the issuer. Market observable inputs used in the sensitivity analysis include credit default swap (CDS) of the Republic of the Philippines, USD interest rate swap rates (IRS) (for the USD denominated issuances) and USD/PHP cross currency swap rates (for the PHP-denominated issuances).

The sensitivity analysis of the fair market value of the structured notes as of December 31 is performed for the reasonable possible movement in the significant inputs with all other variables held constant, showing the impact to profit and loss in the table below:

	Significant observable input other than quoted prices included within Level 1	Range level at yearend	Sensitivity of the input to fair value
2021	ROP CDS level (3yrs-8yrs)	56 basis points	50 basis points increase or decrease in ROP CDS would result in the decrease and increase in market value of the note by ₱1,138,771 and ₱1,151,130, respectively.
	USD IRS (3yrs-8yrs)	143 basis points	50 basis points increase or decrease in USD IRS would result in the decrease and increase in market value of the note by ₱1,138,771 and ₱1,151,130, respectively.
2020	ROP CDS level (4yrs-8yrs)	36 basis points	50 basis points increase or decrease in ROP CDS would result in the decrease and increase in market value of the note by \$\partial{P}_3,430,162\$ and \$\partial{P}_3,473,248\$, respectively.
	USD IRS (4yrs-8yrs)	42-64 basis points	50 basis points increase or decrease in USD IRS would result in the decrease and increase in market value of the note by \$\mathbb{P}_3,430,162\$ and \$\mathbb{P}_3,473,248\$, respectively.
	PHP IRS (1yr-7yrs)	278-338 basis points	50 basis points increase or decrease in PHP IRS would result in the decrease and increase in market value of the note by \$\partial{P}\$365,653 and \$\partial{P}\$367,805, respectively.

Note: The structured VULs can be decomposed into bond components and option components. The sensitivity is only applied to the bond portion of the structured notes. Further, the results of the sensitivity do not reflect stressed scenarios due to the non-linearity characteristics of the product.

Sensitivity of the fair value measurement to changes in unobservable inputs follows:

#### Peso denominated notes:

	Significant	Range level	Sensitivity of the
	unobservable input	at yearend	input to fair value
2020	Bank CDS Level	42-52 basis points	A 50 basis points increase (decrease) in CDS would result in
	(1-7 years)		the decrease and increase in fair value of the note by ₱ 365,653 and ₱367,805, respectively.

Note: The structured VULs can be decomposed into bond components and option components. The sensitivity is only applied to the bond portion of the structured notes. Further, the results of the sensitivity do not reflect stressed scenarios due to the non-linearity characteristics of the product. The peso denominated notes have matured as of December 31, 2021.

#### Dollar-denominated notes:

	Significant	Range level	Sensitivity of the
	unobservable input	at yearend	input to fair value
2021	Bank CDS Level	44 basis points	50 basis points increase or decrease in ROP CDS would result in the decrease and increase in market value of the
	(3-8 years)		note by $P1,138,771$ and $P1,151,130$ , respectively.
2020	ROP CDS Level	23-33 basis points	50 basis points increase or decrease in ROP CDS would
	(4-8 years)		result in the decrease and increase in market value of the note by \$\mathbb{P}3,430,162\$ and \$\mathbb{P}3,473,248\$, respectively.

Note: The sensitivity is only applied to the bond portion of the structured notes. Further, the results of the sensitivity do not reflect stressed scenarios due to the non-linearity characteristics of the product.

The Bank CDS level is based on the closest available CDS maturity of the counterparty matched to the remaining maturity of the structured notes. Further, the Bank CDS, is a proxy for the funding cost of the counterparty which is considered as a significant unobservable input.

The above estimates are based on assumptions that, if altered, can change the analysis expressed herein. This shall not constitute a representation or warranty as to future performance of the structured notes. Further, past performance is not indicative of future results.

There is no other impact on the Group's equity other than those already affecting profit or loss.

# Fair value disclosure under the Amendments to PFRS 4

The table below presents an analysis of the fair value of classes of financial assets of the Group as of December 31, 2021, as well as the corresponding change in fair value for the year then ended. The financial assets are divided into two categories:

• Assets for which their contractual cash flows represent solely payments of principal and interest (SPPI), excluding any financial assets that are held for trading or that are managed and whose performance is evaluated on a fair value basis; and

All financial assets other than those specified in SPPI above (i.e. those for which contractual cash
flows do not represent SPPI, assets that are held for trading and assets that are managed and
whose performance is evaluated on a fair value basis).

All financial assets under VULs are managed on a fair value basis. Accordingly, these are all presented under "Other financial assets" in the above table.

For disclosures related to credit quality of SPPI financial assets, refer to Note 31.

# 31. Insurance and Financial Risk Management

The primary objective of the Group's risk and financial management framework is to protect the Group's policyholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. Key management recognizes the critical importance of having efficient and effective risk management systems in place.

The Group has established a risk management function with clear terms of reference from the BOT, its committees, and the associated executive management committees. This is supplemented with a clear organizational structure with documented delegated authorities and responsibilities from the BOT to executive management committees and senior managers. Lastly, a group policy framework which sets out the risk profiles for the Group, risk management, control, and business conduct standards for the Group's operations has been put in place. Each policy has a member of senior management charged with overseeing compliance with the policy throughout the Group.

The BOT approves the Group risk management policies and meets regularly to approve any commercial, regulatory, and organizational requirements of such policies. These policies define the Group's identification of risk and its interpretation, limit structure to ensure the appropriate quality and diversification of assets, align underwriting and reinsurance strategy to the corporate goals, and specify reporting requirements.

#### Regulatory Framework

A substantial portion of the Group's long term insurance business comprises policies where the investment risk is borne by policyholders. Risk attributable to policyholders is actively managed keeping in view their investment objectives and constraints. IC, the Group's leading regulator, is interested in protecting the rights of the policyholders and maintains close vigil to ensure that the Group is satisfactorily managing its affairs for their benefit. At the same time, the IC is also interested in ensuring that the Group maintains an appropriate solvency position to meet liabilities arising from claims and that the risks are at acceptable levels.

The operations of the Group are also subject to the regulatory requirements of the IC. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions, e.g., capital adequacy, to minimize the risk of default and insolvency on the part of the insurance companies to meet the unforeseen liabilities as these arise.

### 31.1. Insurance Risk

The risk under an insurance contract is the possibility of occurrence of an insured event and uncertainty of the amount and timing of the resulting claim. The principal risk the Group faces under such contracts is that the actual claims and benefit payments exceed the carrying amount of insurance liabilities. The risks associated with the life insurance contracts are underwriting risk and investment risk.

# 31.1.1. *Underwriting risk*

Underwriting risk represents the exposure to loss resulting from actual policy experience adversely deviating from assumptions made in the product pricing. Underwriting risks are brought about by a combination of the following:

- Mortality risk risk of loss arising due to policyholder death experience being different than expected; and
- Morbidity risk risk of loss arising due to policyholder health experience being different than expected.

The variability of risks is improved by diversification of risk of loss to a large portfolio of insurance contracts as a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The variability of risks is also improved by careful selection and implementation of underwriting strategies and guidelines.

The business of the Group primarily comprises life insurance contracts. For contracts where death is the insured risk, the significant factors that could increase the overall frequency of claims are epidemics, widespread changes in lifestyle, and natural disasters, thus resulting in earlier or more claims than expected.

These risks currently do not vary significantly in relation to the location of the risk insured by the Group while undue concentration by amounts could have an impact on the severity of benefit payments on a portfolio basis.

There are no mitigating terms and conditions that reduce the insured risk accepted for contracts with fixed and guaranteed benefits and fixed future premiums.

The Group has an objective to control and minimize insurance risk and to reduce volatility of operating profits. The Group manages insurance risk through the following mechanism:

- the use and maintenance of management information systems that provide up to date, accurate and reliable data on risk exposure at any point in time;
- actuarial models based on past experience and statistical techniques aid in pricing decisions and monitoring claims patterns;
- guidelines are issued for concluding insurance contracts and assuming insurance risks;
- pro-active claims handling procedures are followed to investigate and adjust claims, thereby preventing settlement of dubious or fraudulent claims;
- reinsurance is used to limit the Group's exposure to large claims by placing risk with reinsurers providing high security;
- diversification is accomplished by achieving sufficiently large population of risks to reduce the variability of the expected outcome. The diversification strategy seeks to ensure that underwritten risks are well diversified in terms of type and amount of risk, industry and geography; and
- the mix of insurance assets is driven by the nature and term of insurance liabilities. The management of assets and liabilities is closely monitored to attempt to match the expected pattern of claim payments with the maturity dates of assets.

Insurance risk is also affected by the policyholders' rights to terminate the contract, pay reduced premiums, refuse to pay premiums, or avail of the guaranteed annuity option. Thus, the resultant insurance risk is subject to the policyholders' behavior and decisions.

The Group's concentration of insurance risk before and after reinsurance in relation to the type of insurance contract based on sum assured is as follows:

	2021	2020
Whole Life		
Gross	₱84,135,160,162	₽86,249,890,903

Net	<b>P</b> 284,757,038,957	₱288,635,712,895

### 31.1.2. <u>Life Insurance Contracts</u>

### a. Assumptions

Material judgment is required in determining the liabilities and in the choice of assumptions relating to insurance contracts. Assumptions in use are based on past experience, current internal data and conditions, and external market indices and benchmarks, which reflect current observable market prices and other published information. Such assumptions are determined as appropriate at inception of the contract. Assumptions are further evaluated on a continuous basis in order to ensure realistic and reasonable valuations. Assumptions are subject to the provisions of the Code and guidelines set forth by the IC.

#### b. Terms

Life insurance contracts offered by the Group mainly include whole life, endowments, term insurance, group insurance, and variable insurance.

Whole life and term insurance are conventional products where lump sum benefits are payable upon death of insured.

Endowment products are investments/savings products where lump sum benefits are payable after a fixed period or upon death before the period is completed.

Group insurance policies are yearly renewable life plan products issued to corporate accounts that provide the beneficiaries of the insured employee cash proceeds in the event of the employee's death.

Variable life products provide, in addition to life insurance coverage, living benefit where payments are linked to units of an investment fund set up by the Group from the premiums paid by the policyholders.

For legal policy reserves, the following assumptions are used:

# a. Mortality and morbidity rates

Assumptions on mortality and morbidity are based on the Group's actual experience. Rates are differentiated by age, gender, underwriting class and product type. For life insurance policies, increased mortality rates would lead to larger number of claims and claims occurring sooner than anticipated, increasing the expenditure and reducing profits for stakeholders.

#### b. Discount rates

Discount rates relate to the time value of money. These are based on the risk-free discount rates prescribed by IC. An increase (decrease) in discount rate would result in decrease (increase) in liability that needs to be set up to meet obligations to policyholders.

#### c. Expenses

Operating expense assumptions reflect the projected costs of maintaining and servicing in force policies and associated overhead expenses. The current level of expense is adjusted for inflation in the future. An increase in the level of expense would result in an increase in expenditure thereby reducing profits for the stakeholders.

#### d. Lapses rates

Assumptions on lapse are based on the Group's actual experience. These are differentiated by product type, annual premium level and duration of the policy. Higher lapse rates on lapse-supported products would translate to a decrease in the reserves that needs to be set-up.

#### c. Sensitivities

The application of the MfAD in the assumptions ensure that the resulting legal policy reserves will be sufficient. The scenarios tested involved increasing and decreasing one type of assumption by the recommended minimum MfAD while retaining the others constant at the original base run results.

# 31.1.3. Reinsurance Contracts

# a. Terms and Assumptions

The Group limits its exposure to loss within insurance operations through participation in reinsurance arrangements. The majority of the business ceded is placed on excess share basis with retention limits varying by issue age and underwriting classification.

Even though the Group may have reinsurance arrangements, it is not relieved of its direct obligation to its policyholders. Thus, a credit exposure exists with respect to reinsurance ceded, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements.

The Group is neither dependent on a single reinsurer nor are the operations of the Group substantially dependent upon any reinsurance contract.

#### 31.2. Financial Risk

The Group is exposed to financial risk through its financial assets, financial liabilities, insurance assets, and insurance liabilities. In particular, the key financial risk that the Group is exposed to is that proceeds from its financial assets are not sufficient to fund the obligations arising from its

insurance contracts. The most important components of this financial risk are credit risk, liquidity risk, and market risk.

These risks arise from open positions in interest rate, currency, and equity products, all of which are exposed to general and specific market movements.

The Group has guidelines and procedures on fixed and equity investments. On fixed investments, the Group has to place its investment portfolio in negotiable instruments that will give high-yield, low-risks return without sacrificing the IC and the Group's requirements. The IC requirements state that the investment in fixed instruments shall only come from financial institutions or corporate entities with acceptable ratings from PhilRatings, or at least the rank is within the top 15, in case of banks. Meanwhile, investment in negotiable instruments involving reserve and surplus investments shall follow the guidelines set by the Code (Note 32). On equity investments, the Group has to place its investment portfolio in equity market that will give high-yield, low-risks return taking into account the IC and Group's requirements.

#### 31.2.1. Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

Key areas where the Group is exposed to credit risk pertain to the amounts due from the following:

- Reinsurers in respect of unpaid claims;
- Reinsurers in respect of claims already paid;
- Financial assets at FVPL;
- AFS financial assets;
- Loans and receivables;
- HTM financial assets.

### Risk Concentrations of the Maximum Exposure to Credit Risk

The Group structures the levels of credit risk it accepts by placing limits on its exposure to a single counterparty, or groups of counterparty, and to geographical and industry segments. Such risks are subject to an annual or more frequent review. Limits on the level of credit risk by category and territory are approved by the Division Heads.

The following table analyses the Group's concentration of credit risk in the Group's debt securities portfolio under "Financial assets" in the statement of financial position by industrial distribution as percentage of total debt securities:

	2021	2020
Property	34%	30%
Holding firms	21%	22%
Electricity, energy, power, and water	15%	16%
Financial institutions	9%	12%
Food, beverage, and tobacco	9%	7%
Telecommunications	3%	6%
Tollways operation and maintenance	5%	4%
Others	4%	3%
Total	100%	100%

The Group has a significant concentration of credit risk with counterparties under the "Property" industry as of December 31, 2021 and 2020. Concentrations indicate the

relative sensitivity of the Group's performance to developments affecting a particular industry.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Group's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Group remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalization of any contract.

Reinsurance is placed with high rated counterparties and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year and are subject to regular reviews. At each year-end, management performs assessment of creditworthiness of reinsurers to update reinsurance purchase strategies and ascertain a suitable allowance for impairment of reinsurance assets.

Individual operating units maintain records of the payment history for significant contract holders with whom they conduct regular business. The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Group. Internal audit makes regular reviews to assess the degree of compliance with the Group procedures on credit. Exposures to individual policyholders and groups of policyholders are collected within the ongoing monitoring of the controls associated with regulatory solvency.

The Group manages the level of credit risk it accepts through a comprehensive group credit risk policy setting out the assessment and determination of what constitutes credit risk for the Group; setting up of exposure limits by each counterparty or group of counterparties, industry segments; right of offset where counterparties are both debtors and creditors; guidelines on obtaining collateral and guarantees; reporting of credit risk exposures and breaches to the monitoring authority; monitoring compliance with credit risk policy and review of credit risk policy for pertinence and changing environment.

Loans to policyholders, which are granted at amount not to exceed the policyholder's cash surrender value, are netted off against the cash surrender values of policies and carry substantially no credit risk.

In respect of investment securities, the Group secures satisfactory credit quality by setting maximum limits of portfolio securities with a single issuer or group of issuers and setting the minimum ratings for each issuer or group of issuers.

The Group sets the maximum amounts and limits that may be advanced to/placed with individual corporate counterparties which are set by reference to their long term ratings.

Credit risk exposure in respect of all other counterparties is managed by setting standard business terms that are required to be met by all counterparties. Commissions due to intermediaries are netted off against amounts receivable from them to reduce the risk of doubtful debts. The credit risk in respect of customer balances, incurred on nonpayment of premiums or contributions, will only persist during the grace period specified in the policy document or trust deed on the expiry of which the policy is either paid up or terminated.

The maximum credit exposure of the financial assets of the Group is equal to their carrying value except for mortgage loans and housing loans with collaterals. The financial effect

of collaterals for mortgage loans amounted to \$\mathbb{P}\$16,152,376 and \$\mathbb{P}\$21,716,719 as of December 31, 2021 and 2020, respectively. The financial effect of collaterals for housing loans amounted to \$\mathbb{P}\$54,517,542 and \$\mathbb{P}\$45,959,344 as of December 31, 2021 and 2020, respectively.

Financial effect is the lower of the carrying value of the financial asset or the fair value of the collateral for each financial asset.

The Group uses a credit rating concept based on the borrowers' and counterparties' overall creditworthiness, as follows:

- i. Investment grade rating given to borrowers and counterparties who possess strong to very strong capacity to meet their obligations.
- ii. Non-investment grade rating given to borrowers and counterparties who possess above average capacity to meet their obligations.

The tables below provide the credit quality of the Group's financial assets as of December 31.

<sup>\*</sup>Excluding cash on hand as of December 31, 2020.

For assets to be classified as "past due and impaired," contractual payments in arrears are more than 90 days. Allowance is recognized in the statements of income for these assets. When credit exposure is adequately secured, arrears of more than 90 days might still be classified as "past due but not impaired," with no impairment adjustment recorded. The Group operates mainly on a "neither past due nor impaired basis" and when evidence of impairment is available, an impairment assessment is performed if applicable.

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and the valuation parameters. Collateral is mainly obtained for securities lending. Credit risk is also mitigated by entering into collateral agreements. Management monitors the market value of the collateral, requests additional collateral when needed and performs an impairment valuation when applicable.

Collaterals obtained by the Group are investment properties upon default on mortgage loans and housing loans. The fair value of the collaterals obtained where the Group has the right by contract or custom to sell the assets amounted to ₱178,388,333 and ₱189,495,212 for housing loans and mortgage loans as of December 31, 2021 and 2020, respectively.

### Credit risk disclosures under the Amendments to PFRS 4

The following table shows the carrying amounts of the SPPI assets in accordance with PAS 39 categories by credit risk rating grades reported to key management personnel. The carrying amounts are measured in accordance with PAS 39. For assets measured at amortized cost, the carrying amount shown is before any allowance for impairment loss.

<sup>\*</sup>includes policy loans, accounts receivables, interest receivable, mortgage loans, due from agents and others

For the fair value disclosures required by the Amendments to PFRS 4, refer to Note 30.

#### 31.2.2. *Liquidity Risk*

Liquidity or funding risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from either the inability to sell financial assets quickly at their fair values, or failing on repayment of a contractual obligation, or insurance liability falling due for payment earlier than expected or inability to generate cash inflows as anticipated.

The major liquidity risk confronting the Group is the matching of available cash resources in respect of claims arising from insurance contracts.

The Group manages liquidity through a group liquidity risk policy which determines what constitutes liquidity risk for the Group, specifies minimum proportion of funds to meet emergency calls, sets up contingency funding plans, specifies the sources of funding and the events that would trigger the plan, determines concentration of funding sources, reports of liquidity risk exposures and breaches to the monitoring authority, monitors compliance with liquidity risk policy, and reviews liquidity risk policy for pertinence and changing environment.

The amounts disclosed in the maturity analysis of financial assets used to manage liquidity, insurance liabilities, and financial liabilities of the Group are the contractual undiscounted cash flows based on the remaining period at the reporting date to their contractual maturities or in the case of financial assets at FVPL and legal policy reserves, the expected repayment dates detailed as follows:

<sup>\*</sup>Excluding unearned membership fees of I-Care amounting to P285,914,056

It is unusual for a company primarily transacting an insurance business to predict the requirements of funding with absolute certainty as the theory of probability is applied on insurance contracts to ascertain the likely provision and the time period when such liabilities will require settlement. The amounts and maturities in respect of insurance liabilities are, thus, based on management's best estimate based on statistical techniques and past experience.

# 31.2.3. Market Risk

Market risk is the risk of change in fair value of financial instruments from fluctuations in market interest rates (fair value interest rate risk), market prices (equity price risk), and foreign exchange rates (currency risk) whether such change in price is caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market.

The following policies and procedures are in place to mitigate the Group's exposure to market risk:

- The Group structures levels of market risk it accepts through a group market risk policy that determines what constitutes market risk for the Group; basis used to fair value financial assets and financial liabilities; asset allocation and portfolio limit structure; diversification benchmarks by type and duration of instrument; reporting of market risk exposures and breaches to the monitoring authority; monitoring compliance with market risk policy and review of market risk policy for pertinence and changing environment;
- Set out the assessment and determination of what constitutes market risk for the Group. Compliance with the policy is monitored and exposures and breaches are reported to the Group risk committee. The policy is reviewed regularly for pertinence and for changes in the risk environment; and
- Establish asset allocation and portfolio limit structure, to ensure that assets back specific
  policyholders' liabilities and that assets are held to deliver income and gains for
  policyholders which are in line with expectations of the policyholders.

#### a. Fair Value Interest Rate Risk

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group's fixed rate investments in particular are exposed to such risk.

The following tables show the information relating to the Group's exposure to fair value interest rate risk:

					2021

The following tables provide the sensitivity analysis of the fair value of financial assets and its impact to profit before tax and equity due to changes in interest rates as of December 31:

		Changes in variable	Effect on income before tax	Effect on equity
2021	USD	+ 25 basis points	(₽2,980,537)	( <del>2</del> 43,411,773)
	PHP	+ 25 basis points	(197,340)	(698,395,410)
	USD	- 25 basis points	3,064,031	44,621,923
	PHP	- 25 basis points	200,182	715,442,369
			Effect on income	Effect on
		Changes in variable	before tax	equity
2020	USD	+ 25 basis points	(₱3,031,967)	(₱55,245,650)
	PHP	+ 25 basis points	(224,978)	(706,112,962)
	USD	- 25 basis points	3,106,395	56,951,736
	PHP	- 25 basis points	228,368	722,726,099

The impact on the Group's equity already excludes the impact on transactions affecting profit or loss.

The use of +/-25 basis points is a reasonably possible change in the market value of the debt securities.

### b. Equity Price Risk

The Group's price risk exposure at year-end relates to financial assets whose values will fluctuate as a result of changes in market prices, principally, AFS financial assets, and financial assets at FVPL.

Such investment securities are subject to price risk due to changes in market values of instruments arising either from factors specific to individual instruments or their issuers or factors affecting all instruments traded in the market.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit before tax (due to changes in fair

value of financial recognized in the statements of income) and on statements of changes in members' equity (due to changes in fair value of financial assets recognized in OCI).

	Change in PSE index	Effect on income before tax	Effect on Equity
2021	Increase by 5% Decrease by 5%	₱954,564,491 (954,564,491)	¥1,753,287,613 (1,753,287,613)
2020	Increase by 5% Decrease by 5%	₱1,012,165,352 (1,012,165,352)	₱1,437,291,959 (1,437,291,959)

The impact on the Group's equity already excludes the impact on transactions affecting profit or loss.

Risk Concentrations of the Maximum Exposure to Equity Price Risk

The Group's market risk policy requires it to manage such risks by setting and monitoring objectives and constraints on investments; diversification plan; and limits on investment in each industry or sector.

The table below analyses the Group's concentration of equity price risk in the Group's equity portfolio under "Financial assets" in the statement of financial position by industrial distribution as percentage of total equity securities.

	2021	2020
Financial institutions	52%	39%
Electricity, energy, power, and water	12%	16%
Holding firms	11%	16%
Property	9%	10%
Food, beverage, and tobacco	6%	5%
Telecommunications	2%	4%
Others	8%	10%
Total	100%	100%

# c. Currency Risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group's foreign currency-denominated assets and liability as of December 31 consist of the following:

	2021		20	20
_	<b>United States</b>	Peso	United States	Peso
	Dollar Value	Equivalent	Dollar Value	Equivalent
Assets				
Cash and cash equivalents	\$8,963,441	<b>₽</b> 457,126,546	\$9,453,157	₽453,968,966
Short-term investments	_	_	6,661,905	319,924,665
Financial assets at FVPL	95,424,321	4,866,544,948	88,818,814	4,265,345,884
AFS financial assets	31,039,179	1,582,967,095	37,279,470	1,790,271,998
	\$135,426,941	₽6,906,638,589	\$142,213,346	₽6,829,511,513
Liabilities				
Legal policy reserves	\$439,581	<b>₽22,418,183</b>	\$472,506	₽22,691,155
	\$439,581	<b>₽22,418,183</b>	\$472,506	₽22,691,155

The foregoing United States Dollar amounts have been restated to their Peso equivalents using the exchange rate of ₱50.999 and ₱48.023 to US\$1.00, as recommended by IC, as of December 31, 2021 and 2020, respectively. Net foreign exchange gain (loss) amounted to ₱168,126,782 in 2021 and (₱177,386,780) in 2020.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on income before tax (due to changes in fair value of currency sensitive monetary assets and liabilities).

	Change in	<b>Effect on income</b>
	USD - PHP exchange rate	before tax
2021	Increase by 0.61%	<b>(₽42,267,246)</b>
	Decrease by 0.61%	42,267,246
2020	Increase by 0.51%	₽34,946,234
	Decrease by 0.51%	(34,946,234)

There is no other impact on the Group's equity other than those already affecting profit or loss.

# 32. Capital Management and Regulatory Requirements

# 32.1. Capital Management Framework

The Group manages its capital through its compliance with the statutory requirements on minimum members' equity. The Parent Company is also complying with the statutory regulations on Amended Risk-Based Capital (RBC2) Framework to measure the adequacy of its statutory surplus in relation to the risks inherent in its business. The RBC2 method involves developing a risk-adjusted target level of statutory surplus by applying certain factors to various asset, premium, and reserve items. Higher factors are applied to more risky items and lower factors are applied to less risky items. The target level of statutory surplus varies not only as a result of the insurer's size, but also on the risk profile of the insurer's operations.

The Parent Company considers its total retained earnings amounting to ₱28,302,490,771 and ₱23,554,731,474 as of December 31, 2021 and 2020, respectively, as its capital.

The Group manages its capital requirements by assessing shortfalls between reported and required capital levels on a regular basis. Adjustments to current capital levels are made in light of changes in economic conditions and risk characteristics of the Group's activities. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to policyholders.

To ensure compliance with these externally imposed capital requirements, it is the Group's policy to monitor fixed capital requirements, and RBC2 requirements on a quarterly basis as part of Group's internal financial reporting process.

The Group and the Parent Company fully complied with the externally imposed capital requirements during the reported financial periods and no changes were made to its objectives, policies, and processes from the previous year.

As of December 31, the estimated amount of nonadmitted assets of the Parent Company, as defined under the Code, which are included in the accompanying statements of financial position, follows:

	2021	2020
Property and equipment	<b>₽</b> 167,149,281	₱158,722,990
Accounts receivable and other assets	2,699,904,771	2,529,349,854
	₽2,867,054,052	₱2,688,072,844

The Group is not subject (i.e., under guarantyship, suretyship, or other similar arrangements other than reinsurance in the normal course of operation) to any contingent liability, or capital or purchase commitments as of December 31, 2021 and 2020.

### 32.1.1. Minimum Members' Equity Requirements

Insurance Commission (IC) Circular Letter (CL) No. 2017-14, as amended by CL No. 2019-67, provides for the minimum total members' equity requirements for all mutual life insurance companies on a staggered basis for the years ended December 31, 2016 up to 2022. The term "Members' Equity/Owners' Equity" is equal to the total company assets minus total company liabilities which shall remain unimpaired at all times. The table below shows the amount of minimum total members' equity and schedule of compliance per IC CL No. 2017-14, as amended by CL No. 2019-67.

Minimum Total Members' Equity	Compliance Date
₽900,000,000	31 December 2019
1,300,000,000	31 December 2022

As of December 31, 2021 and 2020, the Parent Company's members' equity is  $\cancel{P}47,816,796,618$  and  $\cancel{P}34,011,301,966$ , respectively.

# 32.1.2. Amended Risk-Based Capital Requirements

In December 2016, the IC issued Circular Letter No. 2016-68 on Amended Risk-Based Capital (RBC2) Framework adopting a three (3) pillar risk-based approach to solvency. Under Pillar 1, all insurance companies are required to maintain the minimum RBC ratio of 100%. Failure to meet the required minimum RBC Ratio based on quarterly and annual submissions shall subject the insurance company to the corresponding regulatory intervention which has been defined at various levels.

The RBC ratio shall be calculated as Total Available Capital divided by the RBC requirement. Total Available Capital shall include the Parent Company's paid-up capital, contributed and contingency surplus, and unassigned surplus. Revaluation and fluctuation reserve accounts shall form part of Total Available Capital only to the extent authorized by the IC.

As of December 31, 2021, the Parent Company's Capital Adequacy Ratio under RBC2 Framework is equivalent to 212% with Total Available Capital and RBC requirement amounting to ₱46,531,478,690 and ₱21,996,925,378, respectively. This is compliant with the minimum statutory requirement of 100%.

The final amount of the RBC ratio can be determined only after the accounts of the Parent Company has been examined by the IC specifically as to admitted and nonadmitted assets as defined under the Amended Insurance Code.

# 33. Maturity Analysis of Assets and Liabilities

The table below shows an analysis of assets and liabilities analyzed according to when they are expected to be realized or settled:
